Story

OLA (ONLINE LAYOUT ANALYZER) BY LACETECH

Funding period

May 24 2019 - Jun 23 2019 (30 days)

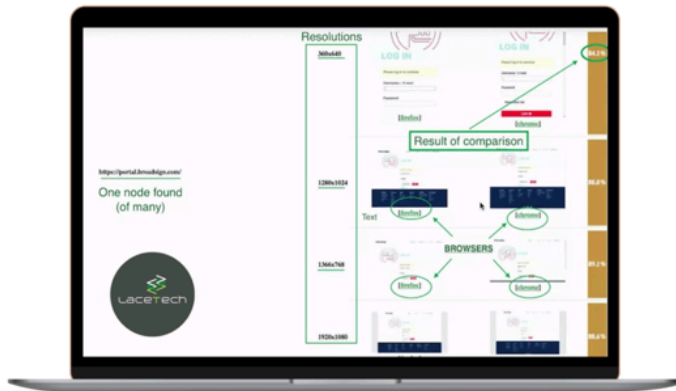

WHAT IS OLA

OLA validate the responsive of you website in minutes

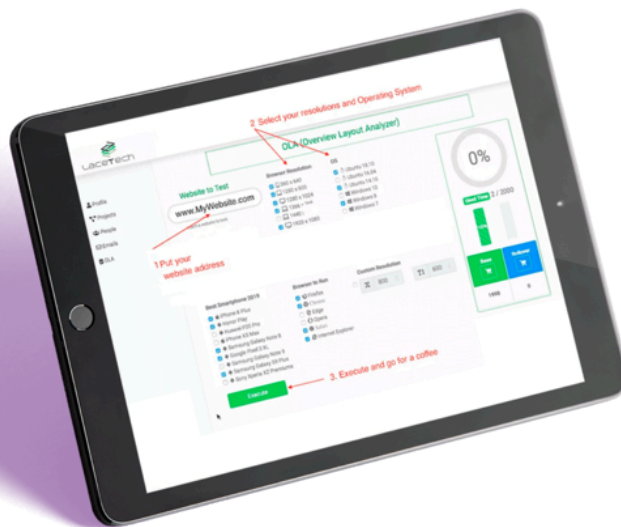

To see an example please see this [ola-report](#)

OLA is an utility to verify the visual integrity of a website across all platforms, OLA saves you time by simultaneously running dozens of tests and generating an easy to understand report. Designers can identify discrepancies without having to go through lines of code.

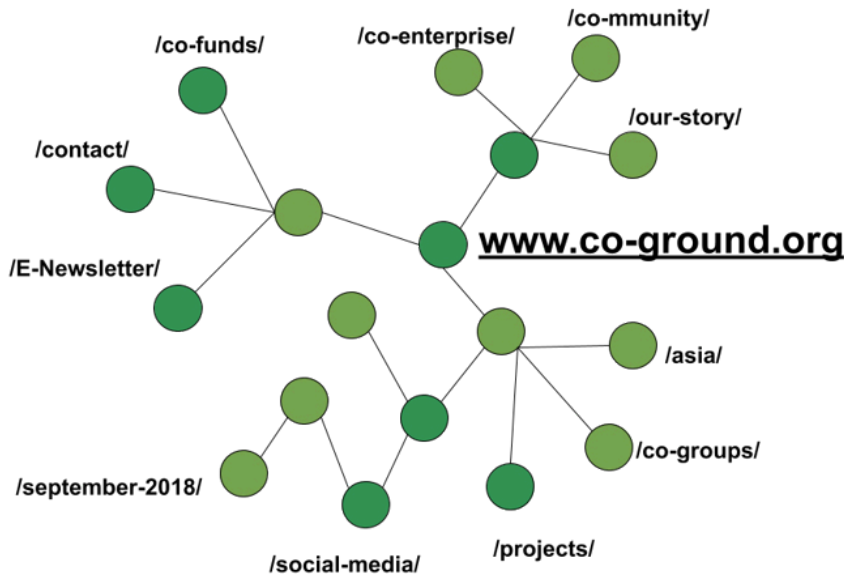

OLA report

Just enter the **name of your website**, select your target **resolutions** and **Operating System** and OLA will do the work while you are away.

OLA: Execute test in one click

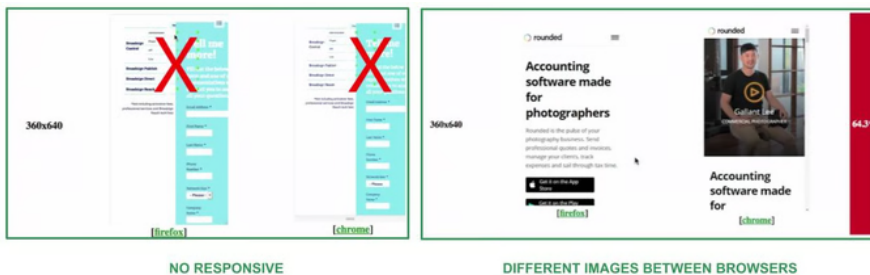

OLA breaks your website into a tree of nodes and analyses them - taking snapshots of each node from the perspective of different platforms.

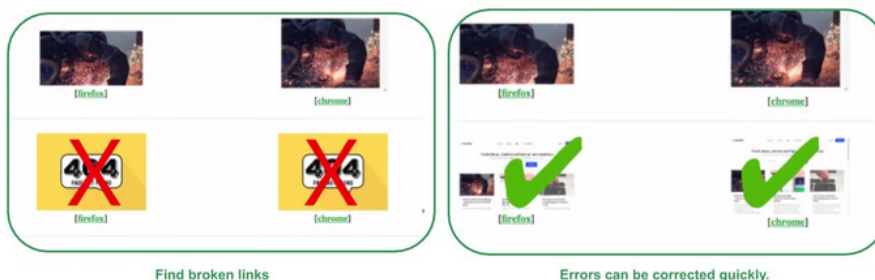

OLA breaks your website into a tree

OLA compares the platforms to make sure your website is fully responsive. Reports offer side-by-side comparisons that allow you to view your entire website at a glance.

Manual testing of all platforms can take weeks and is prone to error. OLA is exhaustive and accurate, finding broken links and forgotten content with ease. With OLA, errors can be corrected quickly - and OLA can verify the functionality of any changes in an instant.

Example: How to indentify errors with OLA

Example: OLA detects erros and validate fixes

OLA: Detect errors in specifiy resolutions

A fully responsive website is a necessity for any organization, but can be difficult to maintain. OLA makes this task easy - and allows you to focus your talents on design and content.

OLA PLANS:

	Run OLA once	Run OLA five times	Basic (For Freelancers)	Pro (For a Group)	Enterprise
Regular Price	\$7 USD	\$15 USD	\$35 USD / Month	\$150 USD / Month	CONTACT US
Kickstarter Pledge	\$5 USD	\$13 USD	\$30 USD / Month	\$125 USD / Month	N/A
Number of URL	1	5	Unlimited	Unlimited	Unlimited
Number of OLA minutes	N/A	N/A	1 000 minutes / month	5 000 minutes / month	84 000 minutes / month
Snapshot stored (File Transfer)	N/A	500MBs / Month	1Gbs / Month	6Gbs / Month	50Gbs / Month
Parallel System	1	1	Unlimited	Unlimited	Unlimited x 2*
Number of Users	1	1	1	5	Unlimited

OLA Plans

- **Run OLA once:** Ideal to validate your website ones.
- **Run OLA 5 times:** Ideal for Freelancers, validate the progress of your website.
- **Basic:** Ideal for Freelancers with many projects, follow the responsive of your website for any change of your developing website.

- **Pro:** Ideal for agencies, six (6) users can use OLA at the same time.
- **Enterprise:** Ideal for companies which needs to validate, not only the web design, but also the functionality such as; Trends, Logins, users, configurations...

What does OLA today?

OLA 1.0

- Create a single report for each of the following Operating System and Browsers:
 - Ubuntu 18, 16, 14 with Firefox and Chrome.
 - Windows 10 with: Firefox, Chrome, Internet Explorer and Edge.
- Execute a test in less than five minutes for a website with about 10 pages and 10 resolutions. (For all Operating Systems)

Why does OLA need the funds?

OLA 2.0

- Compare images from different operating system (Example: Compare a URL with An image from Firefox in Windows 10 with Ubuntu 18).
- Drop the execution time by 75% from the actual execution time: From OLA is executed until the report is downloaded. (upgrade our front-end servers)
- Add more features voted on by users, such as:
 - Include on the OLA report more technical analysis such as; Javascript, cache, download images.
 - Login on the website.
 - Fill any form such as; an user register or contact.

Our plan and schedule

We plan to release OLA by June 17th, 2019. During the 30 days in Kickstarter, we plan to get quick feedback from our backers in order to improve/add the relevant features in OLA.

WHO WE ARE

Julian Tinoco is the founder of Lacetech. He is a Software Developer specialized in Test Automation. He worked in different companies such as; Accedian Networks, Caterpillars, AGT Robotics, Newtrax and Broadsign. Having the chance to work in different technologies, from Telecommunications, Robotics to Embedded System (Hardware) and Web. Julian started Test Automation projects from scratch, and he observed that the success of Test Automation projects is the balance between ROI (Return On Investment), Technology and of course Team Work. One of Julian's biggest goal is the reduction of 25% of manual tests that represent three weeks of software testing.

Julian started a Cloud Automation Test software, using **GNU General Public License**. During this process, he wondered, why Web Designers spend about 30%-40% of their time, checking the responsive of their websites? This is the reason why OLA was created.

The Lacetech's team is growing up faster and they are located in different countries, such as; Canada, Australia and Colombia.

FAQ

What a OLA minute represents?

This is the time spent by each computer. When OLA is executed, OLA defines how many computers are needed, in order to have a report in few minutes. To give you an idea, a normal website with 10 pages, 10 different resolutions and two (2) browsers, provide a report in **less than 5 minutes**.

Can I download the software and use OLA in my own?

Yes, but keep in mind:

- Lacetech works with the version of the software for 6 months to assure his stability, after it the code is launched for the public.
- If you run OLA in your laptop, it could take more than five (5) times if you run OLA through our platform.

Risks and challenges

Today, OLA is working correctly in our development platform. We are working to test OLA with people around the world such as; Canada, England and Australia. During the 30 days of Kickstarter, We are focusing our effort to validate OLA work correctly and prepare it for the official Launch
