Story

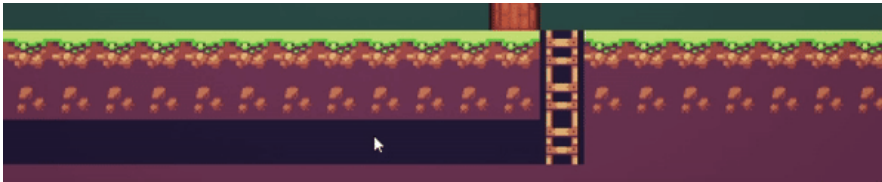

Funding period

Jun 14 2024 - Aug 13 2024 (60 days)

Super Cursor is a challenging precision platformer where you control your very own mouse cursor, who is brought to life and given his own personality! Move through the world as you dodge obstacles and enemies who are stopping you from reaching your beloved princess.

Be careful though, as **anything** that you touch will kill you instantly and you will have to start all over again!

Features:

- Dodge obstacles, enemies, and projectiles thrown your way.
- Original characters, soundtracks and world.
- Online Co-op because two heads are better than one right?
- Bring personality to your cursor.
- Funny, satirical, and rich dialogue.
- Become a time traveler?

- Gameplay that extends outside the game.

Try the Demo on Steam!

Me

Super Cursor has been developed mostly by myself, *Zenfuso*. The Story, design, gameplay, characters, and dialogue were created with my utmost effort. It has been my dream for years to create a game that others can enjoy and play together. This is my first official project and I thank every one of you for supporting this journey!

Risks and challenges

Since this game is being developed by only myself, there are quite a lot to learn throughout the development of this game. There are very real risks of delays and setbacks and I want any backer to know of this risk. I will do my best to get the game and rewards out on time to keep everyone as satisfied as possible. The game is currently planned to be released in early 2025.

Use of AI

I use AI for some of the art for marketing. Some sound designs are also generated from the use of AI.

Environmental commitments

[Visit our Environmental Resources Center](#) to learn how Kickstarter encourages sustainable practices.

Something else

Sustainable Distribution: The content and rewards for this game is only digital, so there are no environmental cost in distribution.
