Story

WHY VISUALLY ?

The brain processes visual information 60,000 times faster than text!!! Visual learners retain information quite differently in comparison to their left brained counterparts enabling them to benefit more from different approaches.

This eBook will visualize Python like never before and I can't wait for you to try it.

- ***Education Is the Most Important Asset That You Can Acquire!***

AS FEATURED IN:

MY STORY

Being a web and graphic designer, the struggles involved in learning programming often led me deep in to books and all over the internet in search for help. In search for some explanation that would make the concepts simpler, easier to understand. And as I saw others failing or giving up all together, I knew I had to make a move. Thus, this project came to life.

THE INTERACTIVE APP WILL FOCUS ON:

- Understanding the basic concepts
- Building a strong foundation in programming
- Memorization of the syntax and terminology of the language
- Work on real world projects
- Practice and having fun

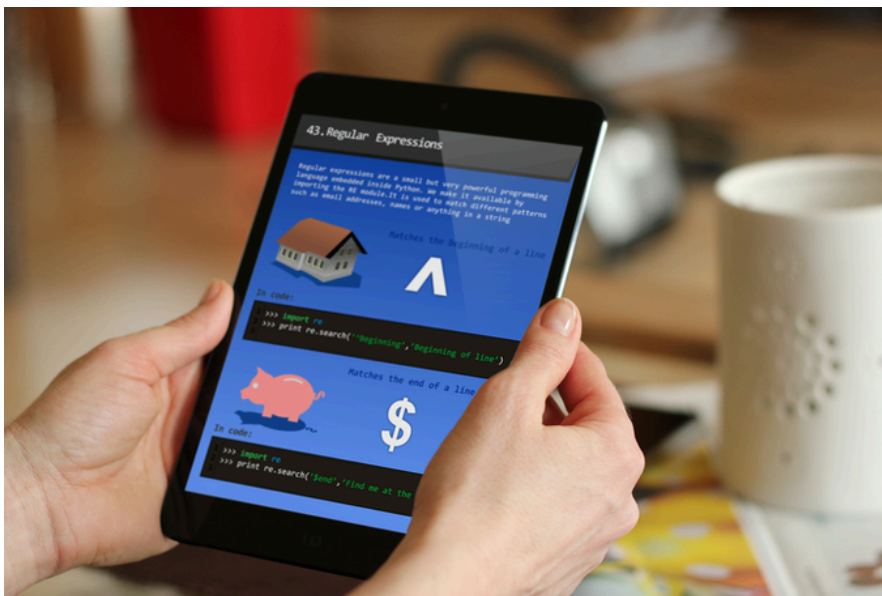

All this will be achieved through the use of Metaphors, Real life objects Analogies and Simple **GAME-LIKE Exercises** that are so much fun to do.

Python concept with real life objects followed by a brief example makes a lot of sense:

Full colour illustrations aid in memory trigger as your brain hardly forgets an **image, schema or metaphor**.

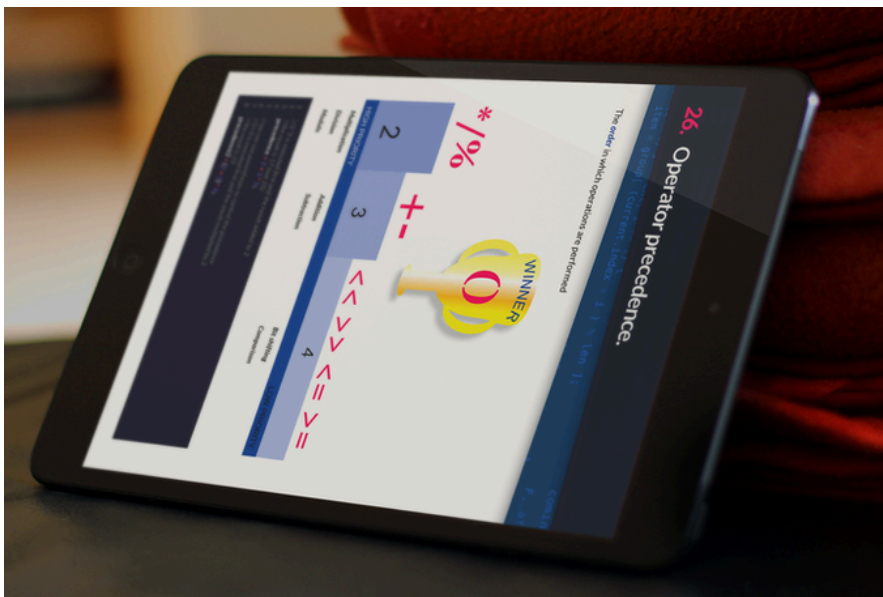

Simply put, **illustrations** have greater impact than words on a page:

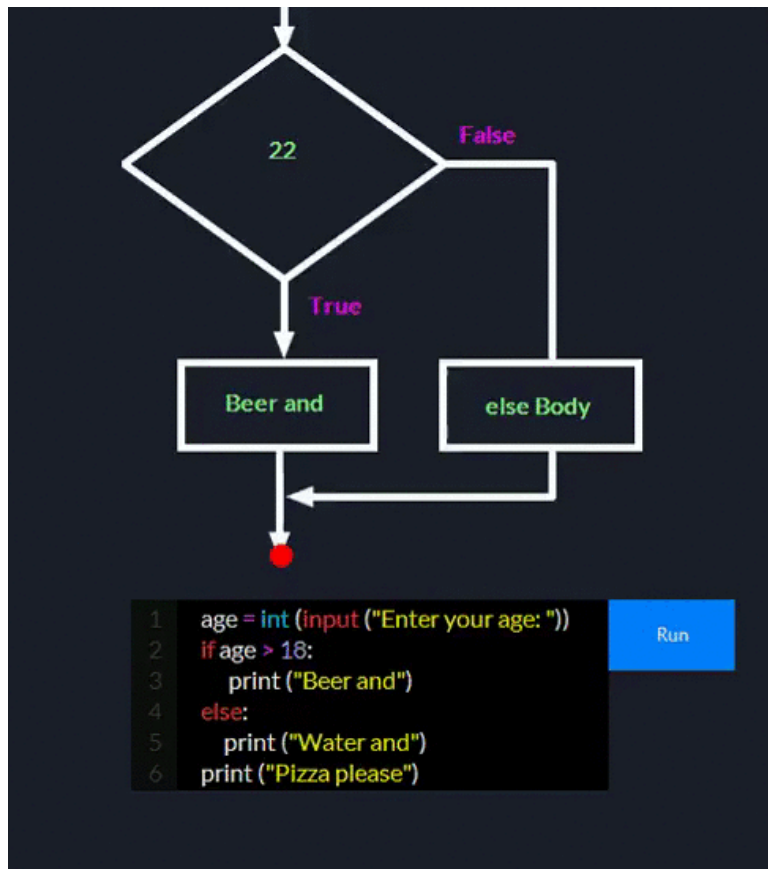

Exercises completed in a game-like fashion:

As Einstein put it, "If you can't explain it simply, you don't understand it well enough."

"If/else" exercise

Full-colour printed version in paperback and hardcover

My books "**Learn JavaScript Visually**" and "**Learn Python Visually**" proved that the system is working.

I learned a great deal from my projects, made a lot of mistakes.

I listened very carefully your comments and suggestions and improved my visual system.

The Interactive "Learn Python VISUALLY" App is the result of that.

I hope that you are just as excited as I am about this project and that you feel the urge to help others by becoming a backer right now.

Not only will you be of help to me, but to thousands of others as well, who have tried and given up in despair on learning the Python language.

I have great conviction in this project and completely believe that it will be of benefit to many who wish to learn and understand the basics of programming.

Show your love and support for code and make this App a success!

THANK YOU for supporting this project, I can't wait to show you what you can learn from this amazing app.

Risks and challenges

Production delays are always an issue but our experienced team will make every sacrifice to deliver a high quality product on time.
