Story

Hi, I'm Bob, the founder of NeatScreen, the Greenscreen starter kit. We are located in Montreal (Canada). Now, we would like to ask the Kickstarter community to help support the final testing costs of a mobile app for greenscreens! We want you to be able to use your greenscreen to mobile videos and professional Zoom calls from your phone or tablet while modifying your webcam background- promote your business, set the tone or amplify your message.

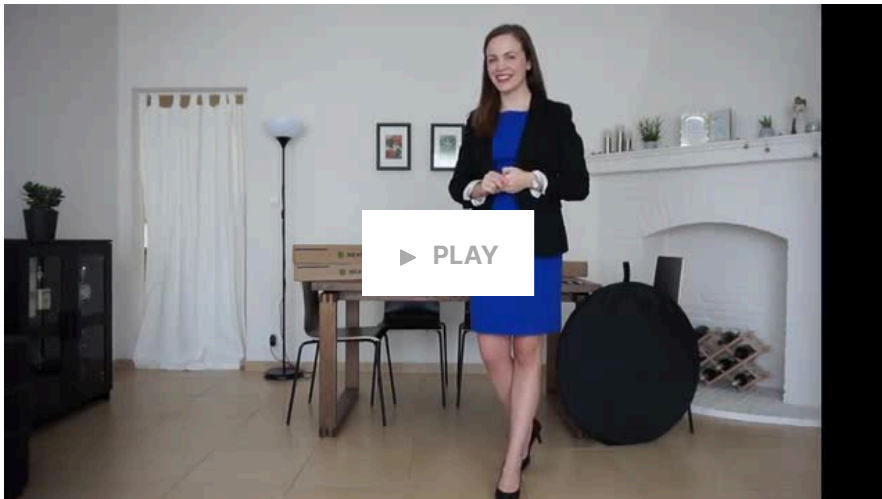

This software will be invaluable to small business owners, work from home, and anyone who makes videos or video calls. In our team, we have all worked in offices and from home, and have struggled with presenting a professional image in video calls and making videos.

Funding from this campaign will be used to test our mobile app version. It will be the perfect complement to our existing product line:

- our design-protected magnetic greenscreen and stand: the NeatScreen,

Funding period

May 28 2020 - Jun 8 2020 (11 days)

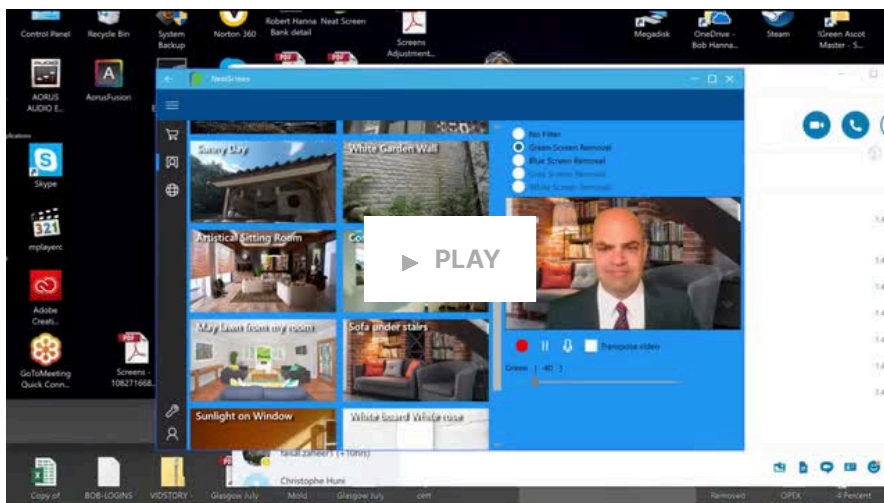

We want to make the work from home experience a breeze and keep it professional!

In under 1 minute, you set the stage: let the professional you shine, without sacrificing your privacy! This app will be ideal for work from home professionals, vloggers and entrepreneurs and anyone on the go, or from any room in your house! It's great for anyone who wants to make quality videos, easily and at a very reasonable cost just by using their phone! It's a great way for musicians to share their music on YouTube, chefs to share their talents and anyone who wants to highlight their skills. Even job recruiters and candidates can benefit from the NeatScreen!

Our new app will be quality software, just like our existing products. We want it to complement our existing NeatScreen line and answer to the demand for a new way of making videos!

The NeatScreen stand and screen is lightweight, and compact and super simple to use. It takes less than a minute to set up, it's easy to

transport and stow in its carrying case. And now, our new software app will be just as portable as the screen!

During this time of increase work from home, please share our campaign with anyone who could benefit from a greenscreen mobile app and contact us directly for all and any questions and queries at bob@greenascot.com, we would love to hear from you!

Risks and challenges

Given that we are at the testing phase of our app, our risks are pretty low. We are ensuring that the team works from home, social distances and stays safe to be able to reach the finish line on this app. As all the testing company is also working remotely, we don't foresee any big risks. Our biggest risk, as our funds are really low, is that we would have to wait for more sales of our other products to gain more cash flow and be able to proceed.
