Story

★ Fitness apps weren't built for everyone -- so we decided to change that.

Most fitness apps on the market are designed for intermediates, packed with cluttered interfaces, confusing charts, and generic experiences. We saw beginners give up and casual users overwhelmed by features that didn't fit their journey.

So we created **RyzaFit** -- a clean, intuitive, data-driven fitness app built for *everyone*.

What makes RyzaFit different?

✓ Accurate Workout Tracking - Fractional Sets & Heart Rate Monitor.

RyzaFit doesn't just count sets — it understands them. This approach is **scientifically grounded and significantly more accurate** than traditional fitness apps.

Funding period

Dec 11 2025 - Jan 10 2026 (30 days)

If a movement trains multiple muscle groups, the app automatically assigns **fractional credit** (e.g., 100% chest, 60% triceps, 40% frontdelt), giving you **far more accurate progress tracking**.

Here are all the features mentioned:

- (Customizable) Fractional Set Counting for Accurate Tracking
- Heart Rate monitor tracking synced via Apple Watch
- Add Workout Notes

✓ Interactive Muscle Anatomy Map

.

Tap any muscle to instantly see how much you've trained it.
Real-time activation, custom hand-drawn vectors, and a level of clarity no other fitness app offers.

✓ Customizable Pinned Charts Dashboard

Build your own analytics space.
Pin your favorite charts, zoom into trends, and see your progress clearly across weeks, months, and years.

✓ Unlimited Routine Generator

Generate unlimited routines with the unlimited routine generator

Generate Unlimited Routines

Custom tailored to your muscle group focus, time window, equipment and more.

Create personalized workout routines instantly.
Generate unlimited training plans tailored to your goals, schedule, equipment availability and experience level -- customize every detail.

✓ A User-Centric Design Philosophy

Every screen, interaction, and feature is built around simplicity and clarity. No clutter. No intimidation. Just a clean, beautiful experience made using native iOS for maximum performance.

RyzaFit creators are passionate about delivering robust functionality without compromising on user experience.

Why we're on Kickstarter

RyzaFit is being built by **Timpi Labs**, our small independent studio.

We're using Kickstarter to:

- Bring in early supporters
- Gather real feedback through TestFlight
- Refine the experience before the App Store launch
- Grow a community that helps shape the product from day one

Your support directly helps us fine-tune core features, expand our analytics tools, and accelerate development so we can ship the best

version possible.

Be Part of the Journey

Backers get **early TestFlight access**, the chance to influence features, and access to exclusive rewards like:

- 1-Year Premium
- Lifetime Premium
- VIP Founder Circle (limited to 2 members)
- And more

Every pledge, big or small, moves this project closer to launch.

Note: For TestFlight pre-launch testing -- please ensure you have access to iOS 18+.

About Timpi Labs

Timpi Labs is our independent software studio building RyzaFit and all future apps in our ecosystem.

Our mission is simple:

Create intuitive, beautifully designed tools that help people improve their lives.

RyzaFit is our first flagship app — and with your support, it will set the foundation for everything we create next.

Join us in building the most accessible, user-friendly fitness experience ever made.

Risks and challenges

Project is in TestFlight stage and will require backers review and feedback.

This project and its rewards are not a replacement for medication, medical treatment, or a doctor's examination. Kickstarter does not endorse or verify the veracity of any claims made on project pages, and is not responsible

for any opinion, advice, information, or statements made by third parties, including creators. Projects on Kickstarter do not claim to diagnose, treat, or cure any medical condition. The Creator is solely responsible for complying with industry standards and applicable laws, including product safety standards.

Use of AI

AI has been used to help write some of the points in this kickstarter. Apple Intelligence AI has been used to summarize user workout sessions in the application, which is a recommendation via Apple. No other AI usage.
