Story

Update: We partnered with Aille Design to offer you an amazing reward!

Aille's designs are inclusive, fully legible for Braille readers, destigmatize disability and educate about the importance of inclusive representation in the fashion industry. They work alongside a diverse team of fashion lovers from blind, visually impaired, and sighted communities. We want to offer you Aille's "fashion is for everyone" t-shirt as a reward!!

Using premium crystal pearls, this black t-shirt design features silver beadwork that reads "fashion is for everyone" in Braille. All Braille beading is applied by hand with high-level precision. It is a beautiful t-shirt!

Together, and with your help, we can make the fashion industry more inclusive!

**We are here because of your 3 million
views on our Tiktok!**

Introducing PRONTI.

An AI-powered daily fashion assistant that learns your style,
helps you dress faster, and buy smarter.

Wow - one tiktok = 3M views!

The people drinking a lot of coffee at Pronti

We are a Canadian startup that started this crazy journey in 2021. Our team has been designing, engineering, and user testing this wonderful app. Pronti is a free app, and there are no subscription fees for users.

On January 3rd, 2022, one of our Tiktok videos went viral (link here), and the number of people downloading skyrocketed. You can imagine our thrill!!!

Unfortunately, our app could not keep up, and we couldn't fix it while so many people were downloading. We needed to implement a waitlist for new users while we fixed the system.

However, this scaling problem is big and we want to move faster. We need your help in getting everyone back on Pronti and getting us closer to

our revolutionary vision. The funds from this Kickstarter will support additional software developers.

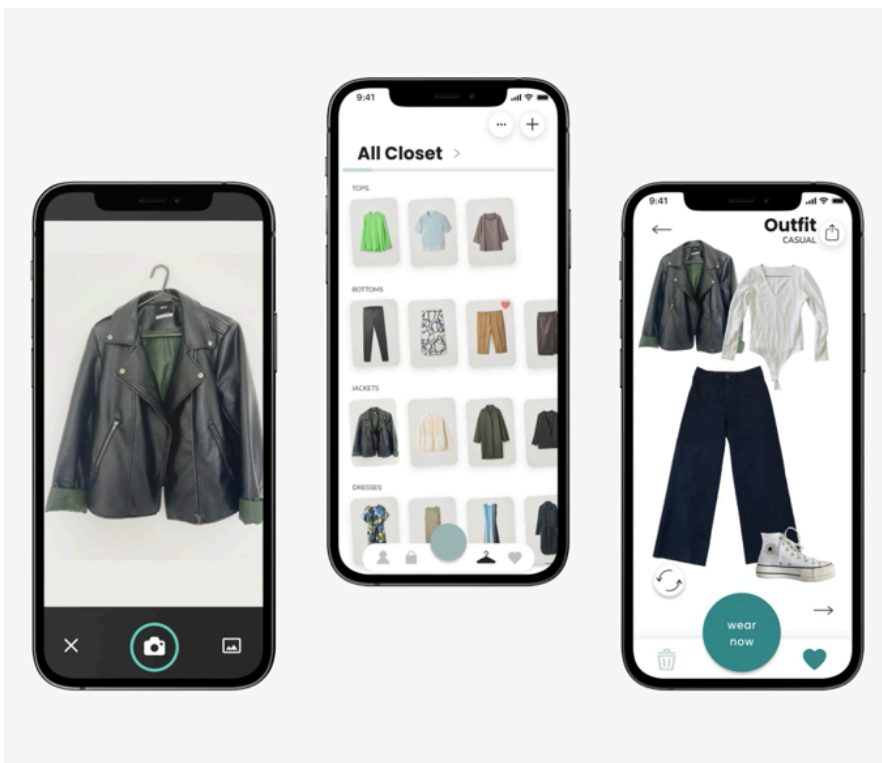

What is that revolutionary vision? You might ask ...

We want to aid users in getting ready faster and buying smarter.

Did you know that it takes a person approximately 17 minutes each day to choose their outfit for the day? That is more than 4 whole days every year we lose wasting time in front of our closet.

Pronti's AI technology knows how to style an outfit and learns from all your interactions with the app. Our technology learns from the photos of your clothes, the outfits you like and dislike, and all your style preferences.

Getting ready faster

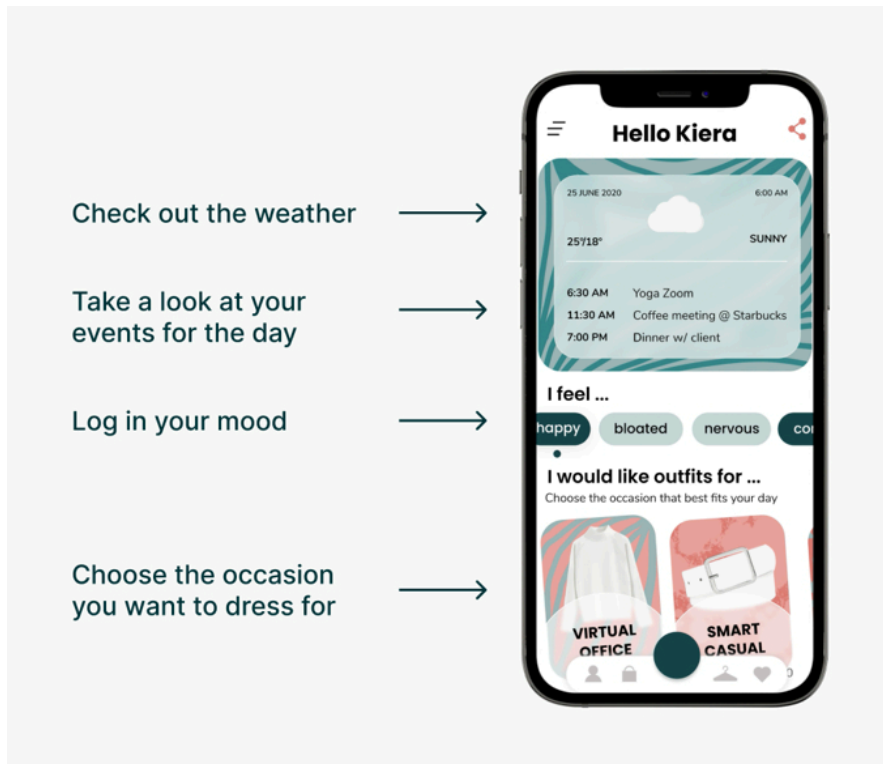

Upload photos of your clothes to your virtual closet! You can do this by taking a picture of your items or uploading them from the web by an in-app Google image search.

Isn't it satisfying to have all your clothes virtually in one place?

Pronti will automatically crop and categorize your clothes! Yes, our ML

system does that for you!

The app then automatically creates stylized outfits from your clothes!!
Pronti takes into consideration the weather, your mood, and the occasion (or style) you want to dress for, to give you the best recommendations.

Stretch Goals

If we pass our goal, we have lots of ideas on how to make the app even better. Here are the stretch goals we would love your additional support for:

1. Share your outfit with your friends
2. Buying Smarter (in beta right now)
3. Connect your Closet to Retailers
4. View your outfit history

Every additional dollar from the stretch goal will go towards the technology
- hiring more developers and putting more resources on our cloud platform.

1. Share your outfit with your friends

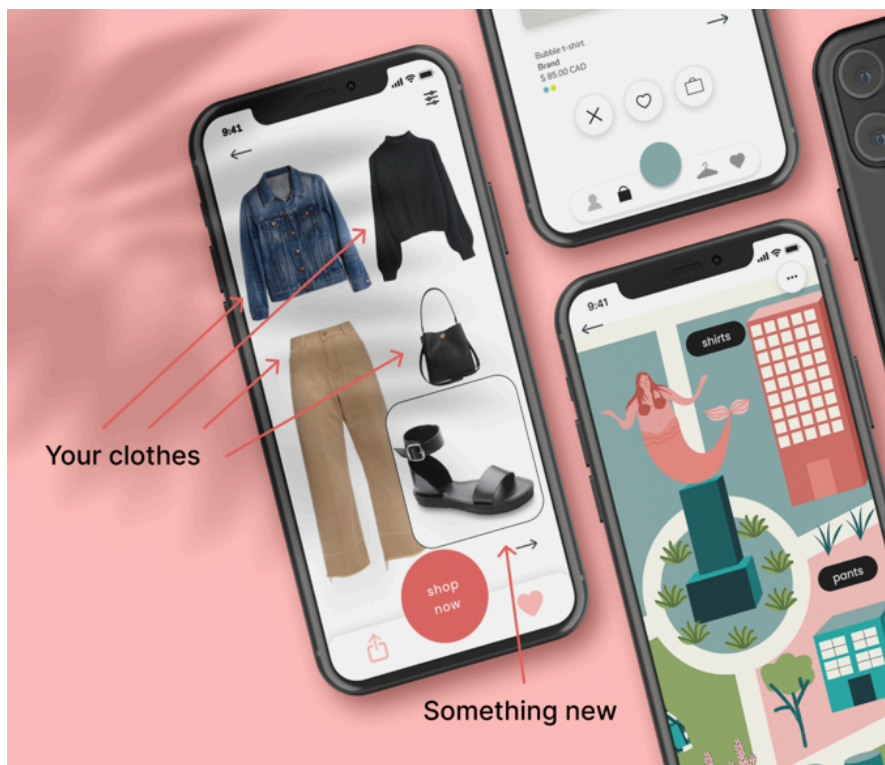

This fun feature makes getting your friend's opinion and getting ready so much more social. We also can't wait to avoid showing up to the party wearing the same thing!

2. Buying smarter - in Beta on the app

We've been working on making online shopping more personal and stopping the endless search.

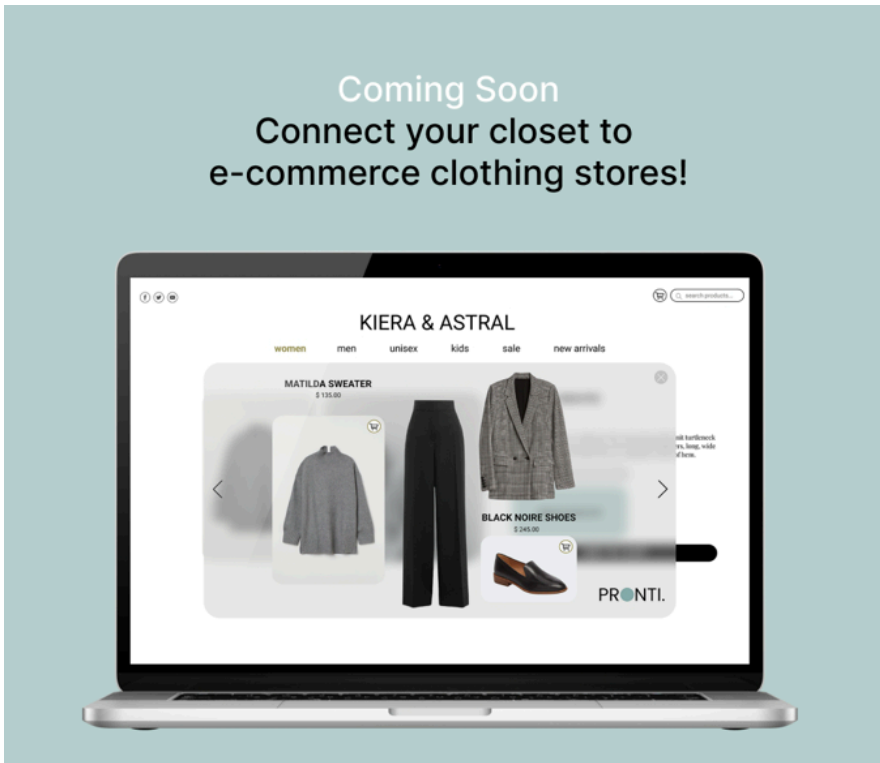

Pronti learns your style through your closet, interactions, and preferences. Based on this knowledge, the app gives you personalized recommendations on what to buy.

Pronti gives you suggestions of new items that match what you already have in your closet. This way you buy clothes that you are actually going to wear. We are here to help you buy more mindfully and consciously.

The shopping part of the app is still in development and we would love your help in making it great! Help us train our ML for amazing suggestions, get more stores into the app, and improve the user experience. If you love Spotify for music suggestions, you'll love Pronti for clothes!

3. Connect your Closet to retailers

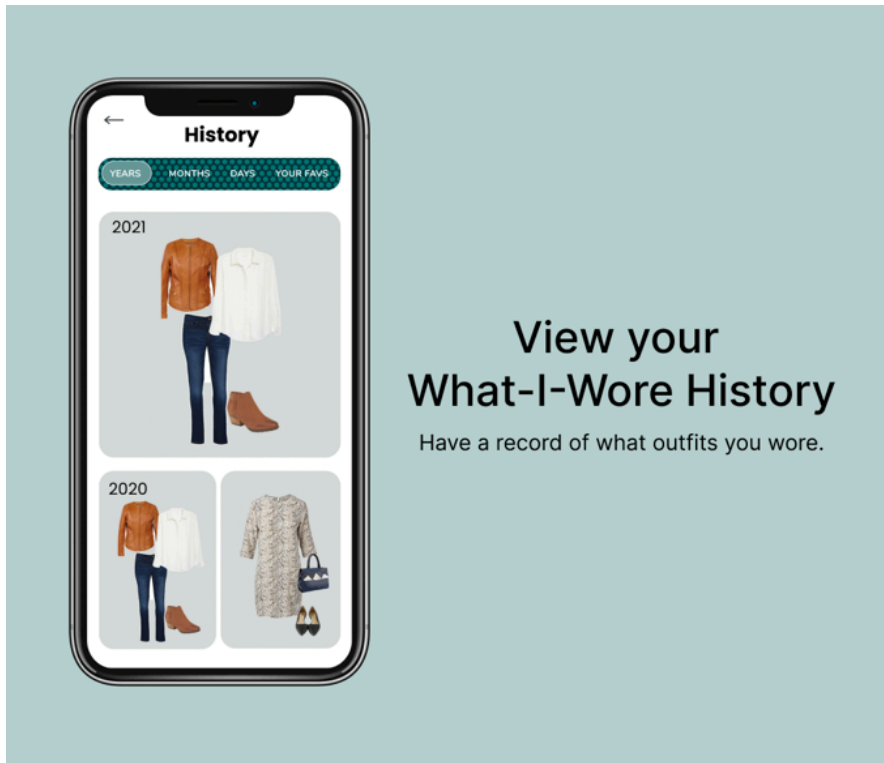

We want you to be able to take your closet everywhere you go! Don't waste your time trying to imagine how a new clothing item would match with what you have in your closet. Pronti's technology gives you outfit suggestions with your clothes and the product you are interested in.

Pronti's retail e-commerce integration is coming soon! Here you will be able to link your Pronti account to the brand's site!

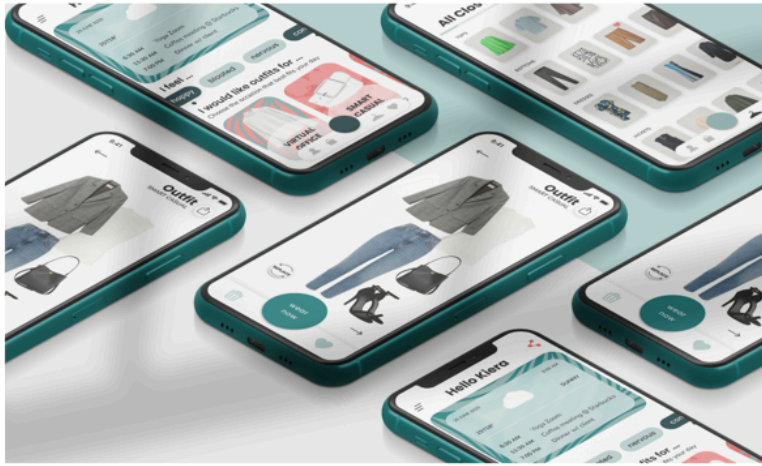

4. View your outfit history

So many people have asked for this feature so they can remember what they wore to the last event with the same people.

What do our users have to say?

Quotes from our Users

Thank you for your support

We are deeply committed to revolutionizing personal fashion! We are extremely thankful to have you on the journey. Your support means the world to us! If you have any questions please feel free to e-mail us at support@pronti.app.

Risks and challenges

Risk 1: More pesky bugs hiding. The risk is that there are more bugs or issues in our technology architecture than we can see right now. We believe this is a small risk and will be mitigated by the help of our technology mentors and the funds from the campaign.

Risk 2: Scaling 100x - We believe scaling this big could have some unforeseen risks but we are going to be using a cloud platform that will help us do this.
