Story

PABAsoft (Paperless Applied Behavioral Analysis) offers groundbreaking newly developed software built to respond more effectively to this growing epidemic, offering a refined approach to the treatment of Autism Spectrum Disorder (ASD). By capturing video data and treating the child with customized programs, PABAsoft improves the effectiveness of Applied Behavioral Analysis (ABA), the leading therapeutic intervention model for children with autism. PABAsoft creates an opportunity for the entire intervention team, including parents, clinicians, funding agencies, and institutions, to communicate about the child's development in an unbiased and efficient manner. Clinicians can begin to monitor, discuss, and respond to each case without the delays of travel or the risks of relying upon interpreted paper-based data. Designed to inspire more children to recover from autism irrespective of where they live, PABAsoft's use of next generation web-based technologies such as Windows 8 and Azure (MS cloud), along with touch screen devices and video compression, makes global collaboration in the field of Autism Spectrum Disorder now possible. The reach is worldwide.

We need help to create the final piece of the product, and would love for the community's support so that we can reach every child in need. Our focus is completely on the child, their family and reducing the costs while improving services. We want to help every child CONQUER AUTISM

Funding period

Feb 4 2015 - Feb 24 2015 (20 days)

Risks and challenges

We want to keep our mission statement pure and focused. By helping us raise the money, and in turn allowing us to help your child or another in need, we will successfully as a community move forward to help these wonderful and special children. Stay focused on the task and not our own personal gain. We want to become a one for one business (like toms shoes) because it takes the village to raise these children.
