YOUR CAR IS TALKING TO YOU, LISTEN

Have you ever gone in for an oil change and been up-sold into spending hundreds?

Have you ever read your owner's manual to review maintenance requirements or visited your manufacturer's website to find updates on recalls?

The average person does not have the time to understand all the ins and outs of their vehicle, which can result in losing money due to misinformation or missed services.

Carnostic provides you with a diagnostic tool that will ensure you never miss an important service or spend on a useless one. With the power of data analysis, Carnostic confidently provides you with real-time feedback right through the familiar face of your phone!

HOW DOES IT WORK?

Carnostic is essentially a cloud-based prognostic maintenance platform. Our proprietary data engine aggregates data from customers' cars across the world, then applies it using artificial intelligence and machine learning to utilize big data.

Our data engine is primed and ready to go, but we look forward to having our kickstarter backers as beta testers to solidify our data based predictions and help us achieve our vision.

OPTIMIZED STATUS:

Your OBDII scanner is connected & calibrated to your phone & your vehicle. This indicates that there are no issues with your car as of yet.

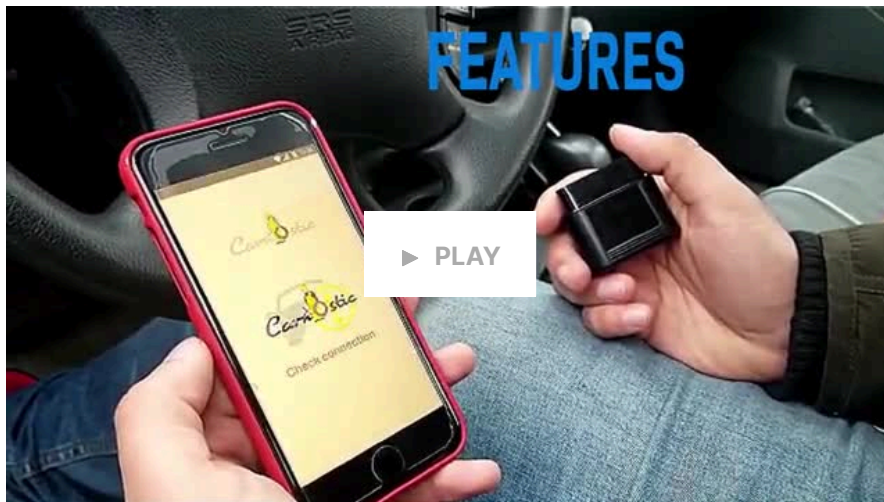

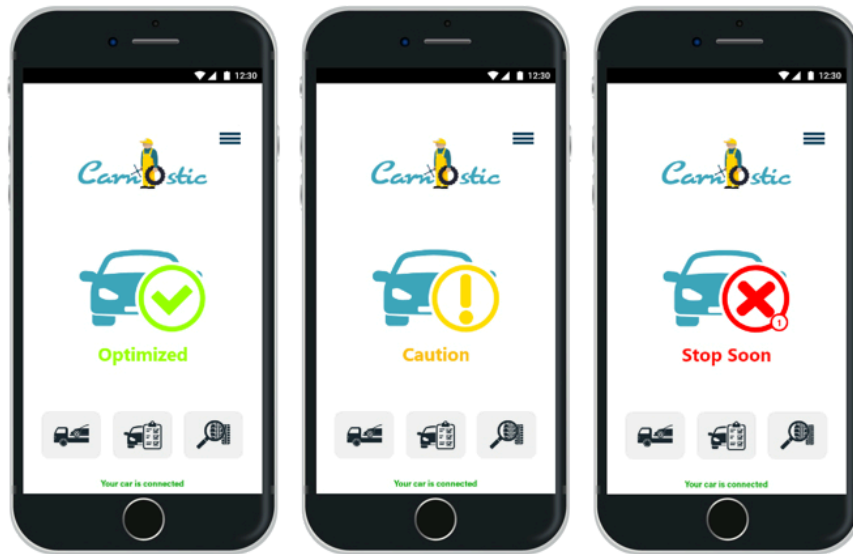

WARNING ICON & CALIBRATION REQUIRED:

Your phone is not calibrated & there may be an oncoming issue that you will need to be aware of. This will also indicate the recalls you should know about from their manufacturers.

IMMEDIATE ISSUE:

The Carnostic OBDII scanner will pinpoint the problems that your vehicle is having. Once the problem is identified, the application will assess whether the issue is something you can fix by yourself or if you need to call an in-app mechanic who can give you the exact quote to get your car fixed.

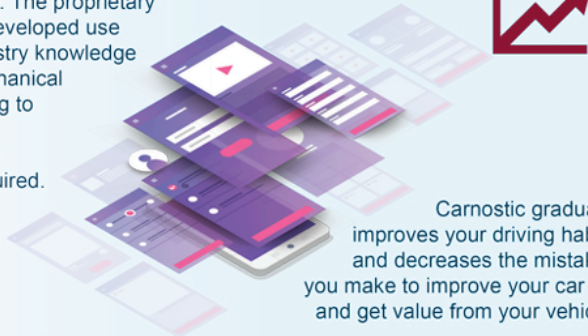

FEATURES

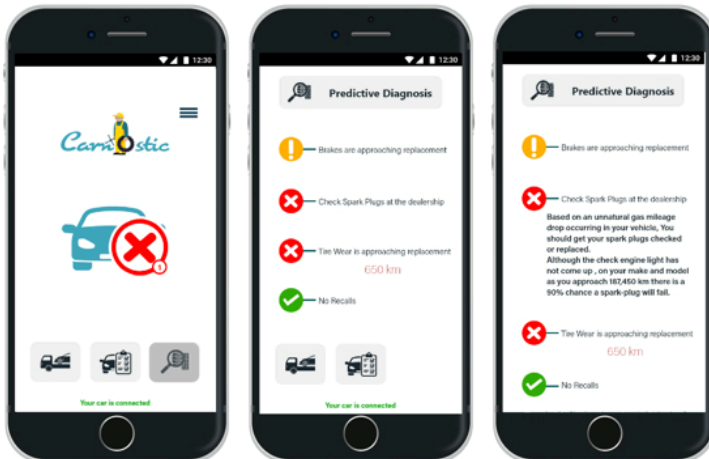

BRAND NEW PROPRIETARY PRE-EMPTIVE DIAGNOSIS

Our team has developed an algorithm software that collects, analyzes, and utilizes data from 600 sensors across your car to predict problems before the check engine light comes up. The proprietary algorithms we have developed use a combination of industry knowledge and cutting edge mechanical & software engineering to intuitively predict with confidence, all repairs and maintenance required.

Carnostic gradually improves your driving habits and decreases the mistakes you make to improve your car life and get value from your vehicle.

TIMELINE & MAINTENANCE SERVICE SCHEDULE

Stay up to date and never miss a service.

Get maintenance recommendations right from the original manufacturer.

Get a specific breakdown of price on parts and labor for all services you should be doing and when.

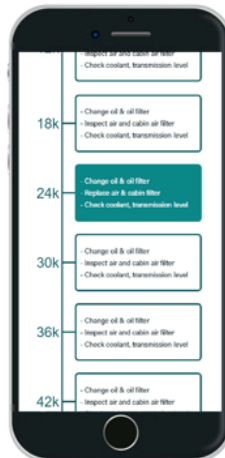

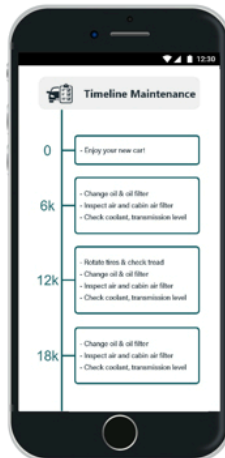

Prolong the life of your car.

See how much money you have saved.

Always be educated on what the original manufacturer actually recommends for your vehicle!

INDUSTRY STANDARD PROFESSIONAL DIAGNOSTICS

SAY GOODBYE TO UNCLEAR CHECK ENGINE LIGHTS

No more vague lights or confusing technical definitions. Just the information that you need to know in simple, understandable terms, right on your smartphone. Carnostic tells you why the "Check Engine Light" is on, the severity, and how much it will cost.

EXPERT IN-APP ADVICE

At the click of our application, users can now call a trusted mechanic who is authorized to give non biased advice about your vehicle.

No more upselling on unnecessary fixes that incentivize mechanics to make extra money.

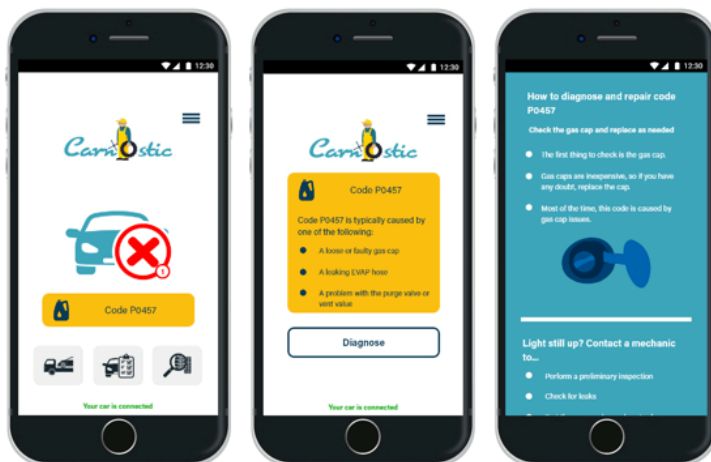

LEARN ABOUT YOUR VEHICLE

Learn more information about the problem, the severity, and the consequences if you keep driving with the light on.

No more frantically searching through your vehicle manual, having to assess & validate what's wrong with your vehicle.

BLACKBOX MODE

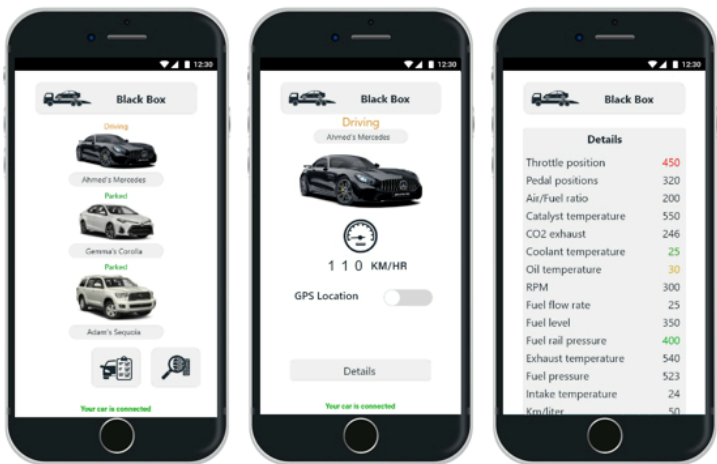

The ability to use your data to prove speed and other performance specs after an accident.

Monitor the speed of cars, packaged with the speed the vehicle is currently driving at.

Link multiple sensors to one account and remotely monitor the health and status of those vehicles, keeping your loved ones safe wherever they are.

WHAT MAKES US DIFFERENT

Carnostic has a distinct competitive advantage in the industry because of its preemptive data-driven approach. We collect data through the OBD device and the cloud-based app in order to not only detect problems with a vehicle, but to also predict any possible future issues as well.

The data is used to detect patterns for different year, make, and model vehicles and is analyzed in order to provide consumers with the information they need to prolong the life of their vehicle. Carnostic is essentially a cloud-based prognostic maintenance platform, our proprietary data engine aggregates data from customers' cars across the world, then applies it using artificial intelligence and machine learning to utilize big data.

This proves as a major plus point for any consumer as maintenance is a significant expense for vehicle owners, and this not only saves the consumer expenses on unnecessary services, but is also proactive in preventing future expenses.

Carnostic is an innovative software that is the first of its kind in the industry to benefit consumers. The entire concept is designed to save consumers from unnecessary expenses and being up-sold which is currently a large concern in the industry. Carnostic is disruptive to dishonest mechanics because it creates a more informed consumer who is able to avoid being upsold for services which mechanics maliciously persuade them into. Carnostic is improving the integrity of the industry, creating informed consumers, and driving for change.

THE TEAM

RAFAY KHILJI CHIEF EXECUTIVE OFFICER

Rafay is the CEO at Carnostic and serves on the Board of Directors. He takes the lead on developing the proprietary prognostic algorithm, and is the force behind the concept, innovation, and drive of Carnostic. Rafay manages, supervises, and delivers strategic input to the team on all fronts. While pursuing a bachelor's degree in mechanical engineering, he has acquired extensive experience working as a mechanic and automotive salesperson. Combining the hands on experience he has attained in the industry along with his knowledge, Rafay is the crucial force that ties Carnostic together.

NOMAN SHAHID SENIOR SOFTWARE ENGINEER

Noman is the Senior Software Engineer at Carnostic. He is responsible for software and app development, user interface, frameworks, and ensuring we deliver the highest quality product possible. He is imperative to facilitating the connection between the proprietary prognostic algorithm and the Carnostic app. Noman is pursuing a double bachelor's degree in computer science and business, has experience developing start-up companies, and is currently working as a software engineering intern in Silicon Valley. He brings a strong list of achievements and value to Carnostic through his experience, making him an integral part of the team.

EMAN FAISAL CHIEF OPERATIONS OFFICER

Eman serves as the Chief Operations Officer at Carnostic. Eman primarily oversees strategic planning and implementation, R&D, communications, and is an integral part of all operations. While pursuing her bachelor's degree in Business from York University, she worked in several different sales and customer service positions, bringing forth expertise in retail. The combination of the knowledge and experience she has is a great asset for Carnostic to be able to reach higher avenues.

AHMED RAMIREZ CHIEF DESIGN OFFICER

Ahmed is the Chief Design Officer at Carnostic. Ahmed is responsible for all design, interface, creative content, product design, and serves a crucial role in bringing the Carnostic vision to life! Ahmed is pursuing a bachelor's degree in Digital Media Development, and has extensive experience working as both a graphic designer and founder of start-up company, Blacktop. He is highly experienced working with UI/UX material as well, making him a great fit for the Carnostic team.

AZHAR MOHYUDDIN CHIEF MARKETING OFFICER

Azhar serves as the Chief Marketing Officer at Carnostic. Azhar is responsible for the planning, development, and execution of marketing and advertising for Carnostic. He handles all things related to market research, product marketing, marketing communications, data analytics, advertising and public relations. While pursuing a degree in marketing, he is also the CEO of a start-up full service marketing company, Global Negotium. The combination of his extensive knowledge and experience takes Carnostic to new heights, and makes him an excellent component of the team.

WHAT WE WILL DO WITH THE FUNDS

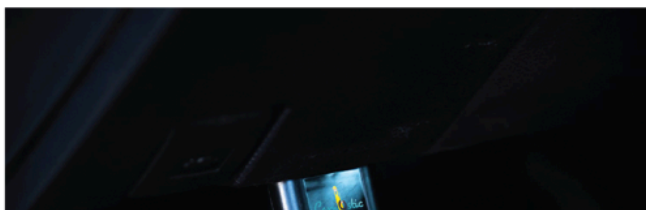

Carnostic is obsessively capital efficient due to everything being done in-house. The app is developed from a non-salaried partner who is a software engineer in Silicon Valley with extensive experience. The marketing is done in house through a marketing sales specialist who is experienced in helping start-ups gain traction and recognition from targeted consumers.

Our whole team is non-salaried in hopes to bring Carnostic to the world affordably and as quickly as possible. We have been able to create our commercial videos and source our materials from cost-efficient sources, making our initial start-up costs more affordable, and beneficial to our the project.

With the funds we would graciously receive, we plan to further advance different aspects of Carnostic such as R&D, marketing, distribution, app development, and improving our reach into global markets in a capital efficient manner. Along with the funds, the data collected from all our backers will serve to speed the accuracy of our AI engine.

Your help would serve a crucial role in taking Carnostic to the next level by making this service quintessential for everyone!

Thank you for being a part of change.

TIMELINE

APRIL 2019 — **KICKSTARTER**

MAY 2019 — FINALIZE APPLICATION
DEVELOPMENT

AUGUST 2019 — BEGIN FULFILLMENT

SEPT 2019 — SHIPPED TO BACKERS

SEPT 2020 — BETA TESTING

FOREVER — FULL SERVICE

AN OPEN LETTER FROM THE CEO

The team at Carnostic has developed an exceptional cloud-based proprietary algorithm software that collects, analyzes, and utilizes data from 600 sensors across your vehicle to predict problems before the engine light turns on. The product saves the consumer from expensive repairs, gradually improves driving habits, and decreases the errors to improve car life and get the value for money spent on the vehicle. Carnostic uses a Bluetooth OBDII scanner to gather the data, and present valuable curated information after handling and analyzing that data from thousands of vehicles. Instead of presenting the consumer with unfiltered data, Carnostic diagnoses and simplifies the data specific to the inquiry of the consumer in a cutting edge, UX based design that is offered on both Android and Apple platforms.

What makes this business remarkable is not just the technology, but the story behind it. I am not only a first generation immigrant, I am a Canadian kid with a dream. Born in Karachi Pakistan, my family and I left to pursue a better quality of life. We arrived in beautiful Ontario, Canada, and lived in a one bedroom basement for several years. While both my parents worked back to back shifts to make ends meet, I took on the responsibility of raising my three younger siblings, who were just toddlers at the time. Very quickly, I learned the hard work that is required to make a living. These hurdles only strengthened my resolve and led me to become the highly motivated entrepreneur that I am today.

My first work experiences began at just eleven years old, when I began mopping the floors and cleaning the windows at my dad's (now failed) grocery store. Seeing my family's source of income collapse, and seeing the effects of debt pile up, taught me invaluable lessons on contingency planning and finance. I decided to take matters into my own hands. I worked long hours every weekend to put myself and my siblings through school. Eventually I found myself in the automotive industry. I quickly collected experience as a mechanic's apprentice and landed a role as a supervisor at a Mr Lube franchise. Here, I quickly developed life skills and acquired experience that would benefit me in all avenues. I was responsible for the store's sales and operations, including end-to-end management of supply chain, sales activities, and service and support. To this day I work full time; 40 hours a week, while completing my Mechanical Engineering degree from the University Of Guelph.

My dad was an amazing role model in my life, and was key to my development. Not only did he show me the losing side to business and provide me with first hand learning, but he also instilled in me the best winning values. One of the values that myself and the Carnostic team pride themselves in is transparency. One day, my mom went to see another mechanic for a simple oil change because I was unavailable to do so. She ended up spending almost a month's worth of salary on "repairing" her car. She did this because she thought she had no other choice, and needed to use her car daily. She was left hungry with almost no money. It became clear that not everyone had our values of transparency. This did not sit right with me, and as a result, Carnostic was born. Carnostic acts as the third party auditor and trusted right hand of any driver. It educates and promotes smart decisions when it comes to your vehicle. For far too long, the automotive industry has been an unforgiving collector of funds. People have thrown money at mechanics only to have their valued vehicles fail to start on the way to an important work meeting, or to that family event they've been planning for weeks. This problem is personal for me, and is the mission behind Carnostic. Carnostic will always strive to be available for the average driver, and with your help can be in your hands very soon!

Best,

Rafay Khilji
CEO

Risks and challenges

We have cultivated a high quality diagnostic software which is built to be long lasting and most importantly save our customers' money, so we wouldn't want them to have to purchase something that wouldn't last! Therefore we source our hardware from reliable manufacturers, so that the device is guaranteed to work in optimal condition alongside the Carnostic app. Of course there are always safety precautions to be taken when working with any vehicle, but not to worry, all Carnostic devices come equipped with detailed safety instructions on using the OBD device. For further assistance and assurance we have demo videos available, outlining the easy steps from start to finish! As always we guarantee to be transparent with our backers and make their Carnostic journey smooth sailing!
