Story

 **CommonLight: Discover Shared Light. Listen. Understand.**

In a world where faith is often used to divide, **CommonLight** was created to do the opposite — to help people *discover understanding through the world's wisdom traditions*.

Funding period

Nov 28 2025 - Dec 28 2025 (30 days)

The Vision

CommonLight is an **AI-powered app** that brings together teachings from the **Bible, Quran, Vedas, Torah, Tripitaka, Guru Granth Sahib, Tao Te Ching**, and more — all in one place.

Ask any question — about love, suffering, purpose, or doubt — and CommonLight will show how *different faiths illuminate the same truth from their unique perspectives*.

It's not about converting.
It's about **connecting**.

How It Works

Ask a Question — e.g., "What is the nature of God?" or "How should I handle anger?"

AI Retrieves Real Teachings — directly from multiple scriptures, verified by translation and context.

Listen and Reflect — each answer comes with **AI-generated narration** for a calm, reflective experience.

Filter and Explore — use **Smart Tags** to dive into topics like *forgiveness, compassion, destiny, and faith*.

Stay Notified — with **real-time updates** when your personalized answers and audio are ready.

Features

 **Multi-Faith Insights** – Explore authentic verses from all major religions side-by-side.

 **Audio Playback & Queue** – Listen and reflect anywhere.

 **Smart Tag Filtering** – Discover questions that inspire you.

 **Real-Time Notifications** – Know when your question is answered.

 **Why This Matters**

Misinformation and religious polarization are growing.

But when you read the world's scriptures together, you find something powerful — **common ground**.

CommonLight helps people see that *faith doesn't have to divide — it can enlighten*.

Whether you're spiritual, curious, or just seeking meaning, this app gives you a safe space to explore what unites humanity at its core.

 **Where We Are Now**

We've built a **working beta app**, available on iOS, that already lets users:

Ask questions

Receive multi-scripture insights

Listen via generated audio

Now, we need your help to **scale, enhance AI precision**, and **cover API and hosting costs** so the app can reach more people worldwide.

 **How Your Support Helps**

Your contributions will go toward:

API and infrastructure costs for scripture retrieval

Expanding audio and translation support

UI/UX improvements for smoother experiences

Outreach and community features

Even small support helps us keep this accessible for everyone — because

wisdom should never be paywalled.

Join the Movement

Support CommonLight on Kickstarter and help us bring understanding, compassion, and shared truth back into everyday conversation.

Risks and challenges

Infrastructure and Scalability

AI queries and audio generation require stable cloud infrastructure. Rapid growth could increase hosting costs.

✂ Mitigation: We're using scalable cloud architecture with efficient caching and batching, ensuring costs remain predictable.

AI Accuracy and Scripture Integrity

Because CommonLight uses AI to retrieve verses from multiple religious texts, there's a small risk of misclassification or partial context.

✂ Mitigation: We use only verified public-domain translations to ensure every verse is correctly sourced and presented neutrally.

Use of AI

My project seeks funding for AI technology.

- ✓ The owners of these works are or will be receiving credit for their work.
- ✓ For the database or source that I will use or will create, the consent of the persons whose works or information incorporated have been obtained.

I plan to use AI-generated content in my project.

What parts of your project will use AI generated content? Please be as specific as possible.

CommonLight uses AI for scripture retrieval and contextual synthesis, not creative generation. Specifically, AI identifies relevant verses from verified scripture databases (Bible, Quran, Torah, Vedas, etc.) and structures the response neutrally. AI is also used to generate text-to-speech audio for scripture readings to improve accessibility.

Do you have the consent of owners of the works that were (or will be) used to produce the AI generated portion of your projects? Please explain.

Yes. CommonLight uses public-domain that are legally available for educational and non-commercial use. Attribution and translation credits are provided within the app and database. No copyrighted or private data is used to generate outputs.

I am incorporating AI in my project in another way.

My project is not raising funds for AI tools themselves, nor does it use AI to create new art or writing. AI is used only as an educational retrieval system — to match user questions with relevant scripture passages and optionally read them aloud through text-to-speech. The goal is to make authentic religious texts more accessible, not to alter or reinterpret them.
