Story

ONE800 is developed by a team of passionate AI enthusiasts on a mission to empower people to explore their curiosity and creativity with AI tools that are accessible and intuitive. We believe that everyone, regardless of their background or technical expertise, should have access to the power of AI technology. As Ph.D. students at the University of Toronto, we were amazed by the possibilities of AI technology, but frustrated by the limited accessibility and fragmented nature of existing AI tools. We knew we had to do something to change that.

Our goal is to make AI accessible to everyone, anywhere, and at any time. With ONE800, users can access a wide range of AI tools, including language models like ChatGPT and tools for generating art in any style. Our platform is designed to help people make better decisions, solve complex problems, and enhance their quality of life.

We believe that by making AI tools accessible, we can unlock a new level of creativity and innovation that can change people's lives for the better. Our commitment to making a difference is reflected in everything we do. We have poured countless hours of research, development, and testing into creating a platform that can truly make a difference in people's lives.

We are driven by a passion for making a positive impact on people's lives and delivering an intuitive experience that caters to the ever-changing needs of our customers. By supporting us on Kickstarter, you will not only be helping us bring our vision to life, but you will also be joining a community of like-minded individuals who share our passion for making a difference. Join us on this journey to democratize AI technology and help unlock the limitless possibilities of AI for all.

Funding period

Apr 2 2023 - Apr 18 2023 (16 days)

Risks and challenges

1. Limited Reach: iMessage chatbots can only be accessed by users who have iPhones or other Apple devices. This can limit the potential audience for your chatbot service.
→ The team has future milestones to bring this service to Android users in the future.
2. User Privacy Concerns: iMessage users may hesitate to share personal information to get the most optimized answer due to privacy concerns.
→ The team is working to ensure the chatbot is compliant with privacy regulations (GDPR and CCPA).
3. Apple's Approval Process: Apple has a strict approval process for iMessage apps and chatbots.
→ The team has already gotten Apple's approval and meets all guidelines.
4. Difficulty in Discoverability: Unless iMessage users know about our chatbot, they won't be able to use it. → The team is working religiously to promote the chatbot and get users to engage with it.
