Story

Ryftborne: Shadows of the Void

The AR Game Where Your World Becomes the Stage

What if your local mall, park, or city streets suddenly came alive with heroes, monsters, and wild creatures from another world?

In **Ryftborne: Shadows of the Void**, mysterious tears — called *Ryfts* — are breaking open again. Years ago, the first Ryft spilled life from a strange dimension known as the Void. Most people forgot it ever happened.

But the Ryfts are back. Wider. Stronger. Impossible to ignore.

From towering beasts to legendary heroes, these Ryftborne beings aren't waiting for us to step into their world — they're crossing into ours.

The Void: Where the Shadows Begin

Each Ryft is more than a tear in the sky — it's a breach that allows its creatures to spill into our cities, our homes, our world. Some come seeking allies. Others... hunger for chaos.

And now, they walk among us — visible only through the lens of your device.

The question isn't whether you'll see them.
It's whether you'll stop them.

Ryftborne Isn't Just a Game — It's a Social AR Experience

Spot creatures in the real world using your phone.

Take epic selfies, videos, and dances with them — TikTok-style but with Ryftborne beings.

Capture and share to show the world who you've faced.

Funding period

Sep 7 2025 - Oct 7 2025 (30 days)

Whether it's a dragon in your living room or a hero at the mall, **Ryftborne turns everyday life into a cinematic AR invasion.**

What We Deliver (MVP)

This is the initial launch — focused, fun, and shareable.

At MVP release, you'll get:

Core AR Gameplay: See Ryfts open in real-world AR and encounter creatures.

Game Mode (Lite): Approach → capture Ryftborne creatures in your environment.

Creator Mode (Lite): Place a hero or monster in your space, record selfies & short videos.

Social Sharing: Post your Ryftborne captures straight to TikTok, Instagram, or YouTube Shorts.

Starter Characters: 6 fully animated beings (3 heroes + 3 monsters).

Backer Beta: Early access testing round for supporters before public release.

This is the **foundation** — a working, playable AR experience with real characters, real captures, and real shareability.

Stretch Goals — Widening the Ryft

The MVP is just the beginning. Each milestone unleashes new features and beings:

\$120K — The First Surge

Expand launch roster to 10 heroes + 10 monsters + advanced animations.

\$225K — Forge Your Own Ryftborne

Text-to-3D Creator (type a prompt, spawn a character).

\$300K — Ryft Marketplace

Upload & sell custom 3D models with built-in royalties.

\$400K — Stand Together

Multiplayer AR encounters (up to 4 players).

\$500K — The Ryft Expands

Persistent Anchors & Remote Encounters worldwide.

Development Roadmap (MVP)

Months 1–3: Core AR engine + basic Game & Creator Modes.

Month 4: Add 6 launch characters + social sharing.

Month 5: Closed beta (backers only).

Months 6–7: Public launch on iOS & Android (MVP release).

Stretch goal features are added after launch, with monthly updates to backers.

Answer the Call

The Ryft has already broken through. The creatures of the Void are here.

This time, we can't ignore it.

Stand with us at the beginning. Back **Ryftborne: Shadows of the Void** today — and be among the first to stop what's coming.

Risks and challenges

Developing Ryftborne involves both mobile AR game development and social media integration, and like any ambitious project, there are challenges. Here's how we're preparing to meet them:

- * **Technical Complexity:** AR tracking, animation rendering, and cross-platform optimization take time. We've built buffer into our schedule and will run closed beta testing to ensure stability before launch.
- * **Licensing & Content Approvals:** Officially licensed heroes or celebrity avatars require agreements with IP holders. If approvals are delayed, we'll launch with our original characters first and roll out licensed content once finalized.
- * **Marketplace & UGC Moderation:** For stretch goals involving user-

generated content, we'll have a clear moderation policy and review system in place to maintain both safety and quality.

* Timeline & Delivery: Mobile development can face unexpected delays. We'll provide monthly updates to backers, sharing progress and any adjustments to milestones so you're always in the loop.

* Platform Policies: Ryftborne will comply with iOS and Android store guidelines. If policies shift, we'll adapt features to stay compliant without impacting core gameplay.

We've assembled an experienced development team, set clear milestones, and built a contingency budget to handle surprises. Most importantly, we're committed to delivering a polished, fun experience — and being transparent with backers every step of the way.

Use of AI

I plan to use AI-generated content in my project.

What parts of your project will use AI generated content? Please be as specific as possible.

Our project will be using AI-generated images for promotional materials, campaign visuals, and concept art to showcase in-game heroes, monsters, and AR scenes. These assets will be used on the Kickstarter page, social media, and marketing materials, and will be generated specifically for this project.

Do you have the consent of owners of the works that were (or will be) used to produce the AI generated portion of your projects? Please explain.

Yes. All AI-generated content will be created using licensed AI tools and datasets that allow commercial use. No copyrighted or unlicensed third-party works will be used as input without explicit permission. Any

characters or likenesses based on existing IP will be original creations or officially licensed before inclusion.
