The internet is full of answers — but not real help.
Every day, millions of people waste hours scrolling through YouTube
tutorials, online forums, or AI chats trying to fix, build, or learn something...

only to end up more confused.

Sometimes you don't need another video or article — you just need *a real human* to guide you, step by step, for five minutes.

💡 The Solution — Tip&Tips

Tip&Tips (T&T) is the world's first *real-time human guidance platform* — a place where experts help you fix, create, or learn anything in minutes. Whether it's repairing your camera, setting up your website, learning Photoshop, or baking your first cake, you'll find someone who knows exactly what to do and can walk you through it.

Think: *YouTube tutorials meet Uber for expertise.*

Through T&T, anyone can:

Find an expert instantly for any skill or problem

Follow live step-by-step guidance (text, video, or call)

Pay only for the time used — as little as \$2 or \$3 per session

Earn money by becoming a verified expert and helping others

It's not another app — it's a new global marketplace of knowledge.

🔥 Why It Matters

We live in a world where time is the most valuable resource.

T&T gives that time back.

It replaces endless searching with human clarity — and creates income opportunities for those who already have skills worth sharing.

This platform empowers everyone: learners, creators, professionals, and teachers.

We're building a world where *every question finds its human answer.*

💬 How We'll Make It Happen

We've already designed the foundation and are now raising funds to:

Develop the full app (mobile + web, integrated payment system, video call support)

Launch the global beta for early supporters and experts

Build our AI-assisted matching engine that connects users with the best expert instantly

Grow the community through marketing, partnerships, and creator programs

The CA\$70,000 raised on Kickstarter will go directly toward:

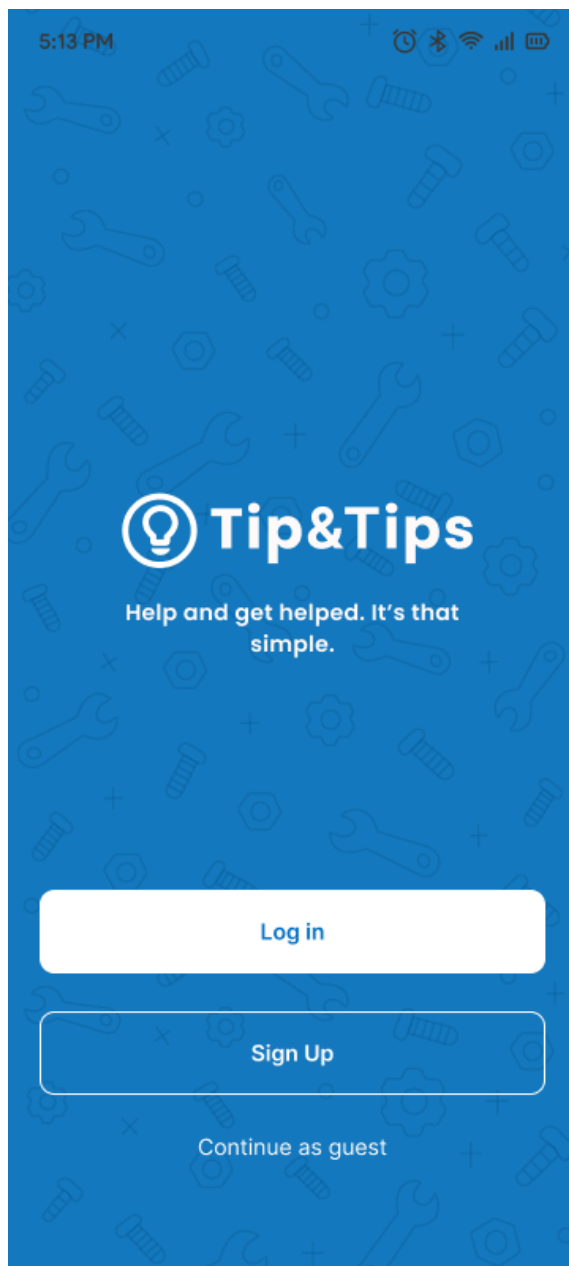

R&D and development (core app build)

Labor (developers, designers, and marketing team)

Infrastructure (servers, APIs, AI tools)

Launch and community building

 **Who We Are**

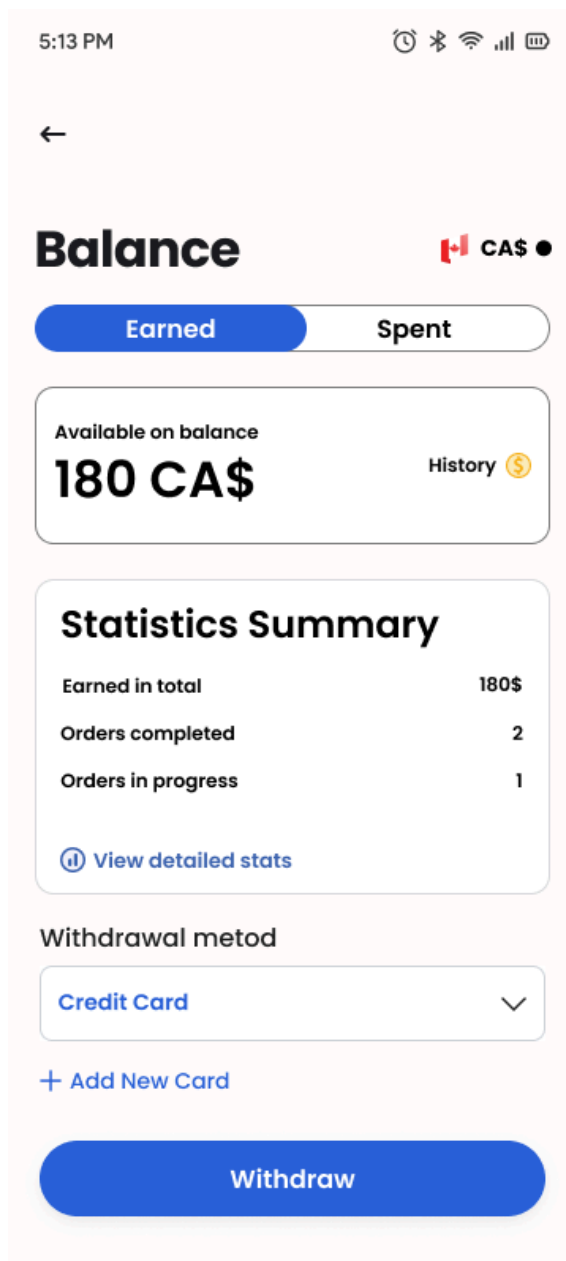

I'm **Fazil Hasanov**, the creator of Tip&Tips — a product designer, entrepreneur, and innovator based in Canada.

I've spent years working on creative and technical projects that connect people, solve problems, and reimagine how humans interact with technology.

T&T began as a simple idea: *What if learning and fixing things could be as easy as calling someone who's done it before?*

That's the mission behind this platform.

 **Join the Movement**

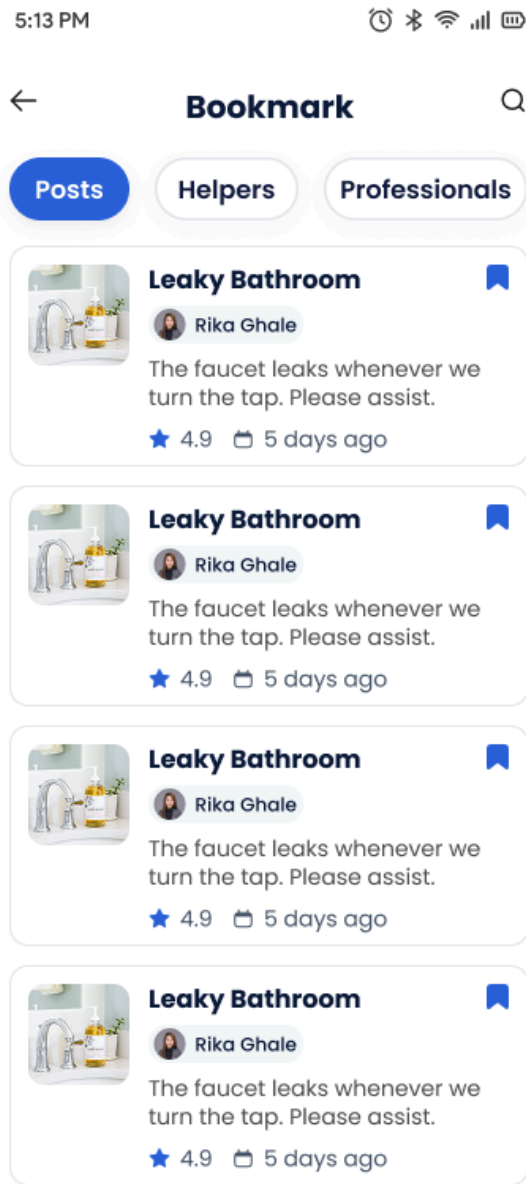

With your help, we'll bring Tip&Tips to life and make expert help available to anyone, anywhere.

Your support doesn't just fund an app — it builds a **new economy of shared knowledge**.

 Back us today and become a **founding member** of Tip&Tips.

Let's redefine how the world learns, creates, and helps each other.

Risks and challenges

⚠️ Risks and Challenges

Every innovative project comes with challenges, and Tip&Tips is no exception.

Our mission — connecting millions of people with real human experts in real time — requires both technical precision and community trust.

Below are the key risks we anticipate and how we plan to overcome them.

🧩 1. Technical Complexity

Risk: Building a reliable platform that supports live expert sessions, payments, and instant matching across the globe is a large-scale task.

Solution: We've already outlined the core system architecture and secured partnerships with experienced developers. Funds from this campaign will go directly toward scalable infrastructure (cloud servers, secure payment gateways, and beta testing) to ensure a smooth launch.

2. User Growth & Community Building

Risk: Like any new platform, early traction depends on reaching enough users and experts to maintain balance.

Solution: We're launching a closed beta for early backers and verified experts first, creating high-quality interactions that attract organic growth. Marketing funds will be strategically invested in partnerships, influencer collaborations, and targeted social campaigns.

3. Payment and Legal Compliance

Risk: Operating a platform that enables global payments requires compliance with financial and data protection laws.

Solution: We'll integrate through trusted payment partners (such as Stripe) and follow Canadian and international regulations regarding user data and income reporting.

4. Development Delays

Risk: Software projects can face unforeseen delays during testing or feature integration.

Solution: Our roadmap is built with realistic milestones and includes a 10% contingency buffer in our Kickstarter goal. We'll keep our backers updated transparently at every stage, sharing real development progress and timelines.

5. Long-Term Sustainability

Risk: Many startups fail after launch due to lack of revenue or user retention.

Solution: Tip&Tips has a clear monetization strategy — experts earn, users pay per session, and we take a small commission. This creates a sustainable model from day one. Our next phase will focus on app store

presence, recurring subscriptions, and partnerships with education and repair brands.

✔ Our Commitment

We're not promising perfection — we're promising progress.

With your support, Tip&Tips will grow responsibly, transparently, and globally.

Every backer will receive updates, access to development previews, and full visibility into how their contributions are shaping the future of human-to-human help.

Use of AI

Tip&Tips is partially powered by AI technology. We use AI to enhance user experience — specifically in expert matching, content recommendation, and real-time assistance. Our AI algorithms help connect users with the most suitable expert for their problem, ensuring faster and more accurate results. The AI is used responsibly, as a supportive tool, not a replacement for human expertise.
