Story

 Project Story: **TeamMates – The App for Teams Who Do More**

We are ALREADY on the App Stores!

iOS <https://apps.apple.com/app/teammates/id6743966128>

Android: <https://play.google.com/store/apps/details?id=com.teammates.app>

What We're Raising Funds to Do

We're building **TeamMates**, an all-in-one app and web platform that makes managing youth and amateur sports easier, faster, and more connected.

With your support, we're raising funds to:

Finalize the **TeamMates mobile app and web platform**

Launch a **registration and admin dashboard** (like Spordle or TeamSnap for Business)

Add premium features like **real-time chat**, **RSVP tracking**, and **smart scheduling**

Provide **onboarding for early teams and organizations**

Cover early **hosting, development, and support costs**

Why We Care

We're coaches, volunteers, and parents — just like you. For years, we've juggled spreadsheets, endless text chains, multiple apps, and last-minute schedule changes. It's frustrating and time-consuming.

We built TeamMates because we believe managing a team should be **simple**, **secure**, and **built around the way real teams operate** —

Funding period

Jun 6 2025 - Jul 6 2025 (30 days)

especially in youth sports. This is our way of giving back to the hockey and sports communities that shaped us.

How We'll Make It Happen

We already have the **core app built**, and we've been testing it with real teams. The foundation is strong — now we're looking to:

Scale our backend infrastructure

Launch advanced web tools for organizations

Polish the user experience and add more integrations

Provide in-depth onboarding and support for early users

We're working with a trusted development team using **Flutter (mobile)**, **Laravel (backend)**, **Firebase**, and **AWS**. Our analytics and subscription tools (Mixpanel, RevenueCat) are already in place — we just need your help to take this to the next level.

Who We Are

I'm a lifelong hockey player and the head coach of a competitive youth travel team for the last 8 years. I also volunteer as a board member for a local hockey organization, where I've seen firsthand how hard it is to manage teams, communicate clearly, and keep everything organized.

I started TeamMates because I knew there had to be a better way — and now, with your help, we can build it **for coaches, parents, and players everywhere**.

We're starting with hockey in Canada — but our goal is to grow across all sports and countries in the next five years.

Join Us

If you've ever struggled with managing a team, missed an update, or wished there was one place to handle it all — TeamMates is for you.

Back this project and be part of the solution. Let's make sports better, together.

Project budget

Making	CA\$ 6,400	>
Taxes & Fees	CA\$ 3,040	>
Fulfilling	CA\$ 500	>

This is a projected budget provided by the creator and may be subject to change.

Risks and challenges

Like any software project, TeamMates faces a few key challenges, but we've planned carefully to reduce risk and deliver successfully.

1. Development Delays

We're building for both mobile and web, which can introduce complexity. Unexpected bugs or testing issues could delay our timeline.

How we'll overcome it:

Our core app is already built and tested. We're using proven technologies (Flutter, Laravel, Firebase, AWS), and we've partnered with an experienced development team. We'll release updates in phases and keep backers

informed every step of the way.

👥 2. Scaling for Teams and Organizations

Supporting hundreds (and eventually thousands) of teams will require strong backend infrastructure and customer support.

How we'll overcome it:

We're already set up on scalable cloud infrastructure. Kickstarter funds will go directly toward hiring extra support and optimizing systems for performance and stability.

3. Feature Scope Creep

There's always a risk of trying to do too much at once, especially with feedback from early users.

How we'll overcome it:

We've defined a clear roadmap for our 1.0 release and will stay laser-focused on delivering the core tools first: scheduling, chat, RSVP, registration, and admin dashboards. All other requests will be prioritized transparently after launch.

💎 4. Sustaining the Business Long-Term

Building the platform is one thing — maintaining and supporting it long-term is another.

How we'll overcome it:

We've built in a subscription model for sustainability (powered by RevenueCat), and we're targeting partnerships with leagues, clubs, and sports organizations. Kickstarter gives us the momentum to build a solid base - and we're in this for the long haul.

In short, we know this won't be easy - but with over 8 years of coaching experience, a solid development plan, and real users already engaged, we're confident we can deliver a game-changing platform for teams everywhere.

Thanks for believing in TeamMates.

Use of AI

I plan to use AI-generated content in my project.

What parts of your project will use AI generated content? Please be as specific as possible.

Some parts of the promotional materials for TeamMates, including written copy (such as the project description, promotional blurbs, and portions of the content script for the Kickstarter video) were drafted with the help of AI tools, including ChatGPT. These materials were reviewed and edited by our team before publication to ensure they reflect our authentic voice and values. No AI-generated images, video footage, voiceovers, or core functionality of the TeamMates app itself involve AI. All design, development, and in-app features are built by our team of human developers and designers.

Do you have the consent of owners of the works that were (or will be) used to produce the AI generated portion of your projects? Please explain.

Yes, I have the right to use all AI-generated content included in this project. For any content generated with ChatGPT, the tool does not require or rely on copyrighted material from third parties. All prompts and inputs used were created by our team, and we have reviewed and edited all outputs to ensure originality and appropriateness for our campaign. No copyrighted or proprietary third-party material was used to generate AI content for TeamMates.
