NOTECAPTOR

A **Catastrophe**  Interrupts the peace
of the planet of **GECA**  .
Our **HERO**  must embark on a journey to
save his kingdom and his beloved **Princess**  .

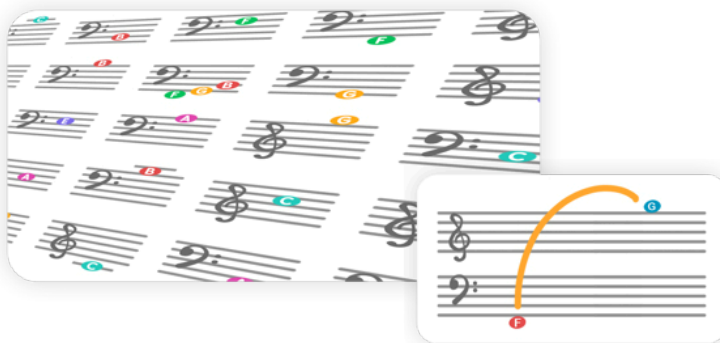

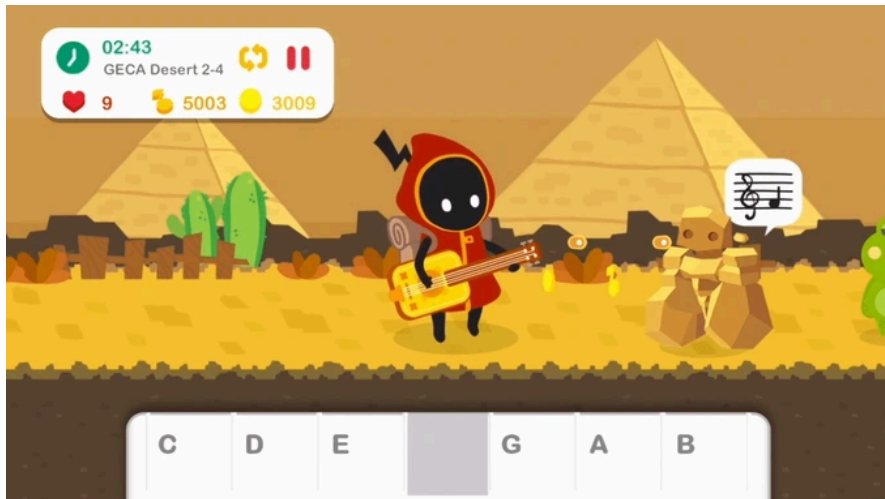

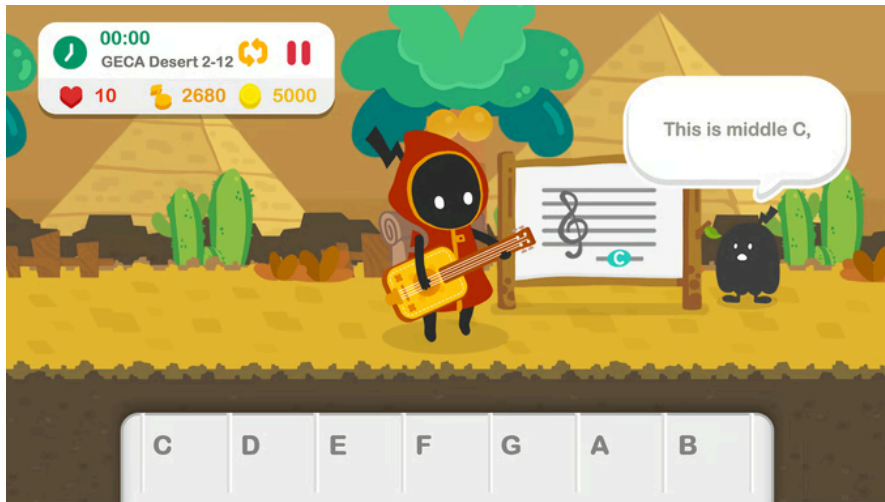

After beating a Video Game, you can gain the ability to read & Musical Notes?

Yes! "NoteCaptor" helps you memorize most common notes on both treble clef and bass clef. It's a great tool for people who want to learn music, especially beneficial for those learning to play the piano. You don't need any prior knowledge or experience; it's beginner-friendly!

Where did the idea for "NoteCaptor" come from?

When I was learning music theory, I encountered various challenges. Reading sheet music proved to be a struggle. As a beginner, I hadn't found any interesting apps or games to make this process enjoyable. That's when I came up with the idea: create a game that makes it easy and fun for everyone to read musical notes.

Once upon a time in the middle of nowhere,
there was a planet called "GECA".

Music was the energy of this planet, inhabitants here loved music.
The prince and princess of GECA played joyous melodies
for their people everyday. Everybody was living in harmony.

Until one day, a crisis occurred ...

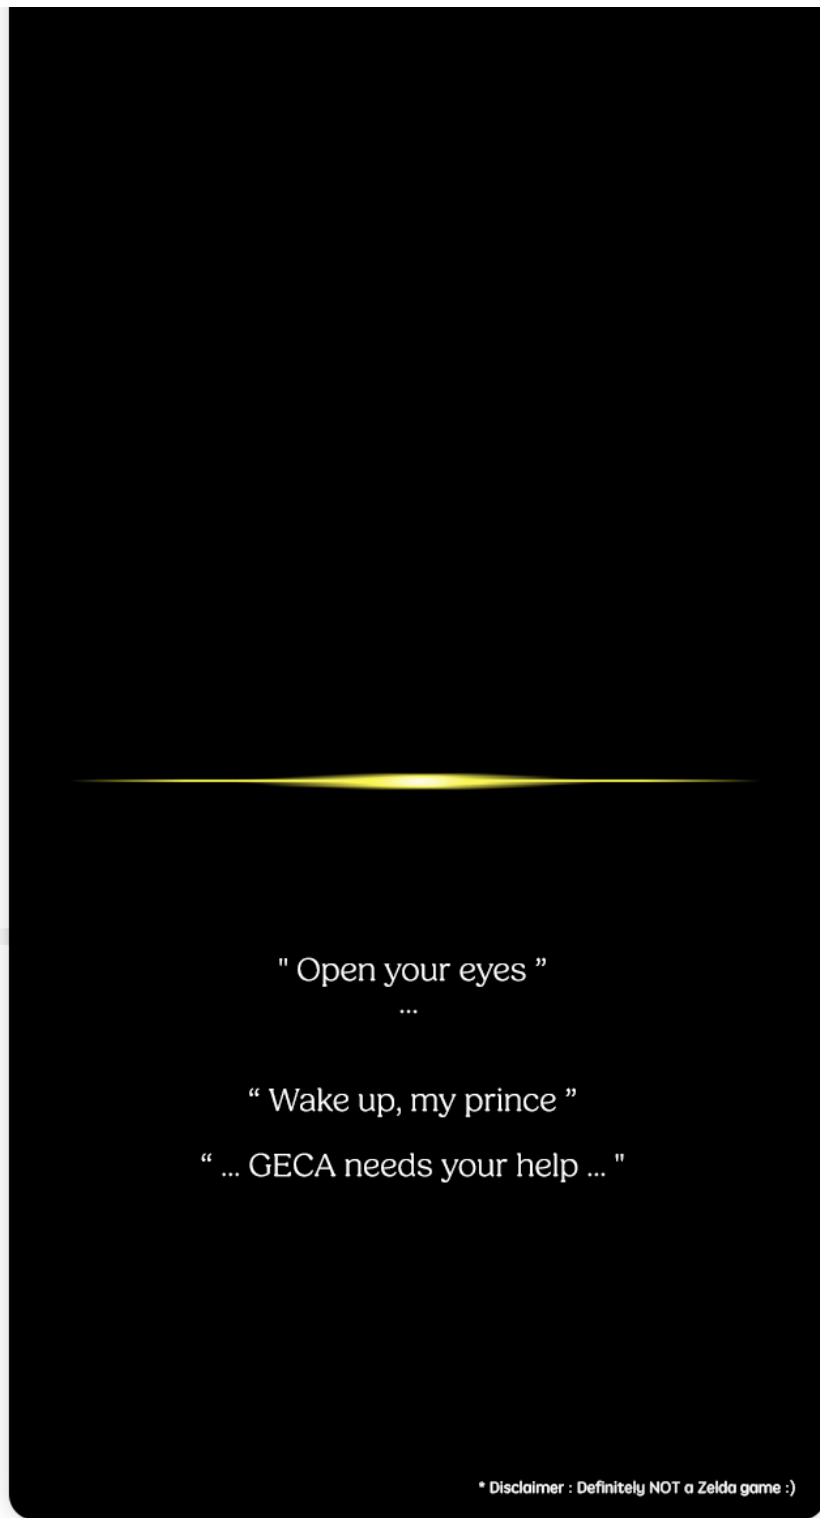

An outside invader started an attack.
He began to absorb the energy from the people on this land.

What was even worse... The princess was kidnapped!
The prince tried to stop it, but unfortunately he was attacked and fainted.

Planet GECA fell to total darkness

Risks and challenges

Although this is my first Kickstarter project, I have invested over a year in preparing for the prototype. The good news is that I have completed the

core mechanics of the game, which are considered the most challenging part for me. The remaining time will be spent on drawing the rest of the sprites, composing music, refining the game content, and fulfilling the stretch goals.
