Story

AntsLabor is an innovative property management app modernizing real-estate oversight. We are automating residential property management through the web app [AntsLabor.com](#) where a digital replica of each individual house will be created as the online profile.

We started from an online platform for property management to enhance the living condition of off-campus college students. Our services range from employing machine learning to automate the numerous utility accounts, to deploying AI to facilitate customers' personal development in various aspects. We are also exploring sustainable construction materials and world-class design for the next generation of smart houses and CleanTech via IoT.

We transfer insightful self-help books into a comprehensive web app. Apply scientific approaches to unleash the potential of undeveloped and underdeveloped human capital. We deliver an information infrastructure that allows us to transition toward the Third Industrial Revolution with a near-zero marginal cost of clean energy.

Our team is solving a social problem by creating new technology. We, humans, have made tremendous progress from enslaving animals and fellow human beings towards utilizing heavy machinery like a railway, an airplane, or a dishwasher. Let's continue the technological improvement of living standards while delegating more tasks to computers. Let computers do what computers do best so that we can spend more time enjoying our lives.

Funding period

Sep 30 2021 - Nov 29 2021 (60 days)

Risks and challenges

Budgeting, timelines, and especially technology direction are various challenges we will overcome to ensure the success of our project.

[Learn about accountability on Kickstarter](#)

Environmental commitments

[Visit our Environmental Resources Center](#) to learn how Kickstarter encourages sustainable practices.

Long-lasting design

The entire project will be performed and delivered online to avoid any carbon footprint.

Something else

Better household utility management to prevent the waste of fresh water.
