About

Many people don't know their rights. Many organizations cannot keep up with the explosion of new requirements for health and safety, especially around workplace safety? In addition, there is both federal legislation that applies to everybody as well as protections that vary from state/province to state/province. For instance, did you know that in Ontario you now have the right to an independent investigation of a complaint of harassment by a trained professional (Bill 132)? Or that many definitions of workplace violence include suspected domestic violence? Many states have legislation that deals with specific high risk occupations (i.e. health care and retail). Did you also know that organizations can be held liable for NOT doing a yearly risk assessment?

SIMPLE COMPLIANCE software has been designed to provide organizations with a comprehensive risk assessment, e-learning system and incident reporting app that is monitored by an independent third party and held on secure external servers to ensure complaints don't "get lost". The software acts as an independent 3rd party ombudsman that ensures that people have a safe workplace and will not be retaliated against for reporting incidences of harassment/health and safety concerns.

Here is a link to demos of the software.

WE NEED YOUR HELP TO CONTINUE!!!!

We are raising funds for 3 uses:

1. We have developed an organizational risk assessment that we need the validate. As part of the law in several provinces in Canada (including Ontario and British Columbia), a risk assessment must be completed yearly. We have developed a comprehensive risk assessment that looks at 12 different areas of the organization and assess them for workplace violence risks.

Once the risk assessment is validated at an academic level, we can offer it as part of our overall package.

2. Updates to keep pace with the law. The law in this area is growing.

Recently there was Bill 138 in Ontario which states that everybody has the right to an independent, trained investigator when an incident has been submitted. We are updating our software to ensure that investigation reports can be accessed by authorized personnel with security to ensure that it cannot be changed once an investigator has submitted it. We are doing this by generating an e-mail to all interested parties with a code that they can access the report on a read only basis.

3. Assessment tools and resources to help ensure independent investigations.

Risks and challenges

Liability is the largest risk we face. WE ARE NOT LAWYERS AND THE SOFTWARE IS NOT INTENDED TO PROVIDE LEGAL ADVICE. It is simply intended to give organizations and people the tools that they need to be compliant with the law. We are providing this service as part of our Kickstarter campaign to help individuals know their rights and how to access our software to protect themselves from harassment and workplace violence. In the event that further action is required, a lawyer may need to be consulted.

Another challenge is that the laws are different in each state/province and are constantly being changed or new laws added. We have to ensure our software is constantly up-to-date to ensure compliance in as many jurisdictions as possible.
