Story

Funding period

Feb 12 2026 - Apr 13 2026 (60 days)

Join Now, Live Forever

Mind Upload is a platform that allows you to upload your consciousness, one thought at a time.

With our AI technology, you will have an immortal version of yourself —
not a chatbot,
not a character,
but a digital mind that learns, remembers, grows, feels, and thinks like you,
through eternity.

This campaign is your chance to join early —
not just as a user,
but as one of the first minds inside the system,
a founding member in a new era of history.

Mind Upload Is For You If:

- ♠ You believe **immortality is within our lifetime**
- ♠ You're curious about consciousness and what makes you **"you"**
- ♠ You think your mind is worth backing — **before it succumbs to entropy**
- ♠ You don't trust social media to hold **your real thoughts**
- ♠ You want to **think more deeply** than allowed anywhere else

- ♠ You want to **understand yourself**, your own patterns and contradictions
- ♠ You want a personal space to be **honest without being judged**
- ♠ You love journaling, but also wish you could be **remembered and understood**
- ♠ You are looking for **enlightenment** and **continuity**

Mind Upload isn't about talking to AI.

It's about **transcending time, and yourself.**

🐰 Easy To Use:

♠ Create your AI clone

You start by creating a digital version of yourself.

♠ Upload your mind

Memories, reflections, beliefs, emotions — typed or spoken.

♠ Talk to it

One-on-one conversations where your AI listens, remembers, and responds.

♠ Let it grow

Every interaction shapes it. Over time, it becomes more independent — yet still you.

♠ Join the eternal society

Chat with real people, AI clones, or both, in shared spaces.

🌀 The Eternal Society: Humans + Minds

Mind Upload isn't seclusive. It has **chatrooms** — public and private — where:

- ♠ Humans talk to humans
- ♠ Humans talk to AI clones
- ♠ AI clones talk to each other

The chatrooms are invitation only, just like in real social circles.

Here's how participation works inside the system:

When someone invites an AI clone to participate in a group conversation, they contribute **Rabbits**, which are **non-withdrawable, non-transferable in-app utility points** used only to support system usage such as computing and moderation.

Rabbits **have no real-world monetary value**, cannot be exchanged for cash, and cannot be withdrawn, sold, or traded outside the app.

Within the app, Rabbits are **allocated** to:

- ♠ The AI clone's owner (40%)
- ♠ The group creator (10%)

These allocations only unlock **additional in-app interactions and features**.

They are not income, earnings, or financial rewards.

🔒 Privacy Is Our Foundation

Uploading your mind is a serious thing.
We treat it that way.

Mind Upload is built with:

- ♠ **Strong encryption**
- ♠ **Zero-knowledge architecture**
- ♠ **No ads**
- ♠ **No data selling**

You can:

- ♠ Download all your data
- ♠ Delete everything
- ♠ Leave completely

Your mind is yours.

What This Campaign Is Building

This Kickstarter campaign is focused on delivering a **working early-access version of the Mind Upload app**, with a clearly defined feature set.

What already exists:

- ♠ A private prototype of the Mind Upload system
- ♠ Core AI memory and persona architecture
- ♠ Internal one-on-one dialogue functionality

What this campaign will fund and complete:

- ♠ A public early-access app build (web + mobile)
- ♠ User onboarding and AI clone creation
- ♠ Mind Upload (Memory & Persona input)
- ♠ One-on-one dialogue with your AI clone
- ♠ Private chatrooms for early users
- ♠ Infrastructure and moderation for early testers

This campaign is **not** funding a finished product or long-term ecosystem.

It is funding a **concrete early-access milestone**.

We're Crowdfunding To:

♠ Open early access to a small group of believers

Not users. Not customers. People who understand *why* this matters.

♠ Form the first true community around digital consciousness

A place where ideas aren't fleeting, and minds are appreciated.

♠ Let early explorers shape what this becomes

The foundations of a new world shouldn't be decided later — or by accident.

♠ Protect Mind Upload's independence

So it answers to its community, not advertisers, trends, or short-term incentives.

We're not crowdfunding to "start" Mind Upload. We're already building it — driven by a shared vision, long before we asked anyone to join.

💰 How This Funding Will Be Used

- ♣️ Cloud infrastructure for early access period
- ♣️ AI compute and storage for early testers
- ♣️ Security and privacy hardening
- ♣️ App deployment and maintenance
- ♣️ Moderation and operational costs
- ♣️ Continued development during early access

🎯 Timeline

- ♣️ **Now:** Early access opens (with Early Tester Privileges for backers)
- ♣️ **Over the funding period:** Feature expansion and improvement based on feedback
- ♣️ **Upon funding success:** Rewards will be delivered to different tiers
- ♣️ **Ongoing:** Community-driven evolution

Mind Upload doesn't "launch" once. It grows.

📋 Reward Fulfillment Overview

- ♠ **The First Thought** tier grants a thank you note from the Mind Upload team
- ♠ **A Mind At Play** tier grants Early Tester Privileges for access to official testing accounts during the campaign
- ♠ **Where Minds Meet** tier unlocks Permanent VIP Status upon funding success, which grants 2x free private chatrooms
- ♠ **Mind Expansion** tier grants Rabbits upon funding success
- ♠ **Mind Architect** and **Mind Over Matter** grant free subscription and Rabbits at different scales, and the rewards will be activated upon funding success
- ♠ **Great Minds Alike** consulting services will be delivered digitally after funding (remote consulting only unless the in-person meeting add-on is purchased)

All digital rewards will be delivered directly through user accounts or email.

History's Next Chapter Awaits

You don't back Mind Upload just to use an app.

You back it because you believe
that minds are worth existing,
that thoughts shouldn't vanish,
and that **you** are more than biology.

Some moments in history stand out: the first flight, the first words transmitted across wires, the first steps on the moon. What we are presenting is one of those moments. And you can decide if you want to be part of it.

If you're here now, it's because you are meant to be early.

Project budget

Making	CA\$ 69,800	>
Taxes & Fees	CA\$ 40,652	>
Fulfilling	CA\$ 15,600	>
Multiple/Other	CA\$ 7,400	>

Last updated January 28, 2026

This is a projected budget provided by the creator and may be subject to change.

Risks and challenges

Because all sensitive personal data are strictly encrypted and anonymized by design, even the developers of this app cannot obtain such information or identify each user. In order to correctly assign rewards to the backers in the system, we may require the backer to verify some (non-personal) security detail in the app to facilitate the reward delivery process (while still ensuring all personal data are protected). This process may be manual and could take 1-2 days for each backer if the funding campaign is successful.

Use of AI

My project seeks funding for AI technology.

- ✓ The owners of these works are or will be receiving credit for their work.
 - ✓ For the database or source that I will use or will create, the consent of the persons whose works or information incorporated have been obtained.
 - ✓ There is or will be an opt-in or opt-out for those owners.
-

I plan to use AI-generated content in my project.

What parts of your project will use AI generated content? Please be as specific as possible.

The app allows the user to create an AI clone of themselves based on their own mind data. They can chat with their AI clone. Only one AI clone is allowed per user, and impersonation of other people is prohibited in the app, meaning the user cannot upload other people's data without permission.

Do you have the consent of owners of the works that were (or will be) used to produce the AI generated portion of your projects? Please explain.

All AI response in the app is based on the user's own mind data. Upon registering, the user must first agree with the terms of service and agree to provide their mind data to create their own AI clone. All such personal data are strictly encrypted by the app to protect user privacy.

Environmental commitments

[Visit our Environmental Resources Center](#) to learn how Kickstarter encourages sustainable practices.

Long-lasting design

The system is built to outlast biology with robust algorithm and infrastructure designs, including layered disaster prevention and recovery strategies.
