Story

Hi There,

This is Niaz, introducing **Brilliance File Organizer Software** here to the community!

So, why and what is Brilliance?

Brilliance File Organizer Software aims to make file organization process efficient and pain free for people who are in a trade where they have a lot of clients and need to maintain large number of files relevant to each clients. Accountants, lawyers, engineers, architects, consultants in various fields, investigators, teachers, and many others will find this software especially useful.

It can also be used as a photo library!

The basic idea is:

- The user creates Client Profiles.
- Attach files and folders to the Client Profiles.
- Add more relevant information such as tags, customs dates, amounts, and description etc.
- Search for files using client's name, ID, tags, dates, and many techniques to pin point a files or files that the user needs to retrieve.
- Search contents (e.g. TAX ID) scanned documents, PDF and image files using Text.
- NOTE: Files are kept in the personal computer of the user. So, no internet connection is necessary. No risk of data breach!

As an example - think of an accountant or a lawyer with 100s or 1000s of clients over the years of his/her career. If the accountant receives a request to retrieve a file from 6 years ago related to a specific client, how tedious the task can be to search through 1000s of documents to find the one in question. Brilliance File Organizer is here to rescue!

This is an ECM (enterprise content management system) for personal computer users with the fraction of the cost!

What are the main features of the software?

Funding period

Nov 12 2017 - Dec 12 2017 (30 days)

1. Client information management with search functionalities
2. Client file management with search functionalities
3. PDF tools to convert, merge, split, password protect and un-protect PDF files
4. OCR tools to convert scanned docs, images and office files into searchable text files
5. Content indexing from scanned docs, images, office files for searching
6. Expense management functionalities
7. Task management with notes and file attachments
8. Powerful and easy to use search engine
9. Compatible with windows operating system
10. Files are kept in user's computer for safety and speed
11. And, more...

Other tools included with the package

PDF Tools - A set of tools to manipulate PDF files. Convert many images, office files etc in to PDF, merge multiple files, page copy or split PDF file to create another, Password protect and un-protect.

Image to Text Tools - A set of tools to convert scanned images, PDF files, office documents etc into Text documents. Brilliance automatically index the extracted text so that they can be searched using Brilliance Search Engine.

Expense Management Tools - A set of tools that lets you manage your receipts. Attach amounts, dates and categories etc to produce yearly, quarterly and monthly reports. Perfect for family and self-employed people.

Task Management Tools - A set of tools to keep track of your small tasks such as mortgage and immigration etc with files and notes attachments. You can turn your task into a reminder.

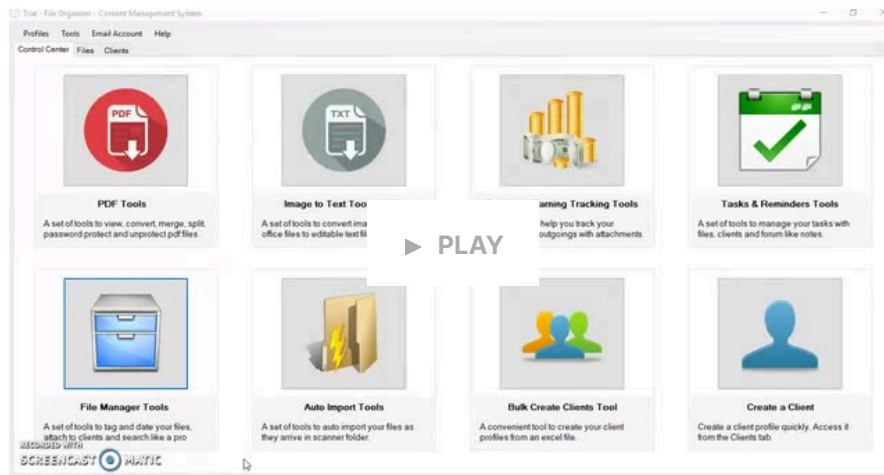

Current state of the software

We have already built the trial version of the software that can be downloaded for free from our website <http://www.brilliancesoftware.com>. The software is free to use during the Trial period.

Why here at The Kickstarter?

- Brilliance File Organizer is a startup. The fund will help us to continue the innovative works that we have put into building this software so far.
- We want to help solve a common problem. We are confident that the software will be able to help community members here.
- We are looking for feedback. Please help us with constructive feedback.

We hope to build a community around this innovation as it has been created keeping community in our minds. Please let us know your feedback. There is also a forum and a blog on our website www.brilliancesoftware.com. Feel free to participate, we will appreciate it.

Risks and challenges

We do not need any special permission from any 3rd party as I am the founder, architect, main developer and copyright holder of this software and the associated website.

The main risk that we faced during different phases is that we are building this system for personal computer users who may or may not be proficient in using computer applications. So, we really had to design it carefully to make it as easy to use as possible.

We also had to tackle various issues such as license validation, download server, payment processing etc. As we have run the project end to end, we have come to realize that there are many hidden issues that must be resolved before we can publish it to the public.

However, as being a Consultant Software Engineer and a Lead Architect by profession with 17 years of experience, I am more than qualified to tackle these issues. To me, these are minor issues. The major factor was effort that I have put into it considering my family, my time, my other professional engagements.

I have taken a 3-month extended off of my regular work to complete this project, and I am glad that I am ready to publish it.
