Story

Sumitt is AI-powered summarization software that summarizes long documents, such as scholarly journals, articles, papers, book chapters, legal cases, financial reports, and more. These days, digital content is endlessly made available to us. For example, many studies show a lot of students feel so overwhelmed with the number of readings they have to do that they do not do them at all. Or, they try, and understand nothing. This leads to decreased confidence, missing class, and overall lower grades. Sumitt is a tool that can solve this problem by generating a shorter and simpler version of any document without compromising the quality of comprehension for the user.

Our beta testing survey shows that students who used Sumitt's assistance decreased their reading time by 70% and in some cases, increased their comprehension of the content too!

Our novel algorithm extracts the important parts of any document and presents it in a simpler, easy-to-understand format by shortening sentences, user smaller fragments, and better words. We use a combination of AI and machine learning techniques to accomplish this extremely reliable, correct, and quick outcome.

Funding period

Feb 11 2022 - Mar 13 2022 (30 days)

Risks and challenges

We are working very hard to build cutting-edge AI technology for you! We have challenges in maintaining enough funds to develop and test our software
